Chapter I—Civil Service Commission

PART 6—EXCEPTIONS FROM THE COMPETITIVE SERVICE

Department of Agriculture

Effective upon publication in the FEDERAL REGISTER, paragraph (j) (1) of section 6.111 is amended as set out below.

§ 6.111 Department of Agriculture.

(j) *Foreign Agricultural Service.* (1) Agricultural Attache positions at grade GS-16 and above where the duties require that the major portion of the employee's time be spent in foreign countries.

PART 24—FORMAL EDUCATION RE- QUIREMENTS FOR APPOINTMENT TO CERTAIN SCIENTIFIC, TECHNICAL, AND PROFESSIONAL POSITIONS

Urban Planners

Section 24.150 is added as set out below.

§ 24.150 Urban Planner, GS-020-5-7.

(a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) The requirements for a bachelor's degree in an accredited college or university in city, urban or regional planning or in a curriculum related to planning such as landscape architecture, architecture, or engineering, or in sociology, urban geography, economics or public administration, where the undergraduate curriculum has included at least 6 semester hours of course work in city, urban or regional planning; or

(ii) Course work in an accredited college or university with major study in one of the fields listed above which included at least 24 semester hours of course work in some combination of those fields with at least 6 semester hours in city, urban, or regional planning. In addition, the applicant must

also have enough experience or additional education to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that when combined with the required 24 semester hours, it gives the applicant technical knowledge comparable to that normally acquired through the successful completion of a full 4-year course of study described in subparagraph (1) of this paragraph.

(b) *Duties.* Urban Planners perform professional work in the development of comprehensive plans, programs and regulations for the orderly physical growth and renewal of cities, towns, metropolitan areas and other population centers, including military installations. The work involves the collection, analysis, and evaluation of facts, trends and proposals and the projection of this information into plans, programs and recommendations to guide the future orderly and unified growth and renewal of the population center. It includes among other things, consideration of population and income trends, construction costs, public finances, intergovernmental relationships, and existing and future needs for land use, public utilities, community facilities, housing, circulation and transportation.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without specialized training which gives an individual a sound basic knowledge of the principles governing the development of comprehensive plans for the orderly growth and renewal of cities, towns, metropolitan areas, and other population centers. The duties of these positions require the application of specialized knowledge of the political, economic, cultural, and physical factors which must be considered in developing plans covering the most appropriate location and arrangement of land uses and facilities in urban areas. This required training and these required knowledges can be acquired only through the successful completion of a directed course of study in an accredited college or university, which has comprehensive libraries and thoroughly trained instructors who can evaluate the progress of the professional training competently.

§ 443.101 Administration.

(a) The program will be administered by the Oils and Peanut Division, CSS, under the general direction and supervision of the Executive Vice President, CCC, or the Vice President, CCC, who is Deputy Administrator for Price Support, CSS. In the field, the program will be carried out by Agricultural Stabilization and Conservation State Committees and

by Agricultural Stabilization and Conservation County Committees (hereinafter called State and County Committees) and the Dallas CSS Commodity Office.

(b) State committees in tung nut producing States shall carry out the provisions of the 1960 tung nut price support program in such a manner that price support will be made available to all eligible producers.

(c) Forms will be distributed through the offices of State and county committees. All documents in connection with warehouse storage loans on tung oil and purchase agreements on tung nuts and tung oil will be approved by the county office manager or other employee of the county office designated by him to act in his behalf. Such designation shall be on file in the county office. Copies of all price support documents shall be retained in the county office.

(d) State and county committees and the Commodity office do not have authority to modify or waive any of the provisions of this bulletin or any amendments or supplements hereto.

§ 443.102 Availability.

(a) *Area.* The program will be available in the States of Alabama, Florida, Georgia, Louisiana, Mississippi, and Texas.

(b) *When to apply.* Purchase agreements covering tung nuts will be available from the beginning of the marketing year, November 1, 1960, through January 31, 1961. Loans and purchase agreements covering tung oil will be available from November 1, 1960, through June 30, 1961.

(c) *Where to apply.* Application for price support should be made through the office of the county committee which keeps the farm program records for the farm.

§ 443.103 Methods of price support.

Price support will be available to eligible producers of tung nuts by means of purchase agreements for eligible tung nuts and tung oil and non-recourse loans on eligible tung oil stored in approved storage facilities.

§ 443.104 Eligible producer.

(a) An eligible producer shall be any individual, partnership, corporation, association, estate, or other legal entity producing tung nuts of the 1960 crop as landowner, landlord, tenant, or sharecropper. The beneficial interest in the tung nuts tendered for purchase under a purchase agreement, and in the tung nuts and the resultant tung oil tendered for a loan or for purchase under a purchase agreement, must be in the producer making such tender, and must have always been in him or in him and a former producer whom he succeeded either as landowner, landlord, tenant, or sharecropper before the tung nuts were harvested. Any eligible producer or group of eligible producers may designate in writing, on the form or forms approved by CCC, an agent to act on the producer's behalf or on the joint behalf of a group of producers in obtaining price support under this program.

(b) Any cooperative association of producers (hereinafter called "cooperative") which normally handles or crushes tung nuts delivered to it by eligible producers or markets tung oil delivered to it by eligible producers shall also be considered an eligible producer with respect to the oil produced from 1960 crop tung nuts delivered to it by eligible producers or with respect to eligible tung oil delivered to it by eligible producers provided all of the following requirements are met:

(1) The beneficial interest in the tung oil and the tung nuts from which such tung oil was extracted is and always has been in the eligible producers who deliver the tung nuts or tung oil to the cooperative or in such producers and former producers whom such producers succeeded either as landowner, landlord, tenant, or sharecropper, before the tung nuts were harvested;

(2) The major part of the tung oil handled or marketed by the cooperative is extracted from tung nuts grown by members who are eligible producers;

(3) The eligible producers share proportionately in the proceeds from marketings of eligible tung oil according to the quantity and quality of eligible tung nuts or tung oil each delivers to the cooperative;

(4) The cooperative has the legal right to pledge the tung oil as security for a loan as well as the authority to sell such tung oil under purchase agreements; and

(5) The cooperative maintains records showing separately (i) the total quantity of tung oil processed by it from 1960 crop tung nuts obtained from all sources, (ii) the total quantity of tung oil obtained from all sources, (iii) the total quantity of tung oil processed by it from 1960 crop tung nuts obtained from all eligible producers, (iv) the total quantity of 1960 crop tung oil obtained from all eligible producers, (v) the total quantity of tung oil processed from 1960 crop tung nuts obtained from eligible producer-members, and (vi) the total quantity of 1960 crop tung oil obtained from eligible producer-members. The cooperative shall make its records available to CCC for inspection at all reasonable times through June 1963.

§ 443.105 Eligible tung nuts and tung oil.

(a) *Tung nuts.* Tung nuts must be from the 1960 crop, and must be matured, air dried with hard hulls dark in color and suitable for milling.

(b) *Tung oil.* Tung oil must have been extracted from 1960 crop tung nuts and must meet sections 3 and 4 of Federal Specification TT-T-775, Tung Oil, Raw (Chinawood) dated May 28, 1957 (hereinafter referred to as Federal Specifications). The eligibility of tung oil delivered under this program must be evidenced by a certification, signed by the producer or an agent designated as provided in § 443.109(f) or in the case of a cooperative by an authorized officer thereof, in the form prescribed in § 443.109 (d) or (e), whichever form is appropriate.

§ 443.106 Disbursement of loans.

Disbursement of loans on tung oil will be made to producers by financial institutions, pursuant to the Provisions for Participation of Financial Institutions in Pools of CCC Price Support Loans of Certain Commodities (23 F.R. 3913 and 24 F.R. 5277) and any amendments or supplements thereto, or by sight drafts drawn on CCC by the county office. Disbursement shall not be made later than July 15, 1961, unless authorized by the Executive Vice President, CCC. Payment in cash, credit to the producer's account, or the drawing of a check or draft shall constitute disbursement. The date of such draft, check, credit or cash payment shall be considered as the date of disbursement of the funds. The producer shall not present the loan documents for disbursement unless the tung oil represented by the loan documents is in existence and in good condition. If the tung oil is not in existence and in good condition at the time of disbursement, the total amount disbursed under the loan shall be promptly refunded by the producer.

§ 443.107 Approved storage facilities.

Approved facilities shall consist of storage facilities made available by tung oil mills and others having adequate facilities for handling and storing tung oil for which a tung oil storage agreement on Commodity Credit Corporation Form 77 for the 1960 crop has been entered into with CCC through the Dallas CSS Commodity Office. The names of owners or operators of approved facilities may be obtained from the Dallas CSS Commodity Office and State and county ASC offices.

§ 443.108 Maturity date of loans and period of notification to sell under purchase agreement.

(a) Loans on tung oil mature on October 31, 1961 or on such earlier date as may be determined by CCC.

(b) Producers who elect to sell tung nuts under a purchase agreement must notify the county committee of their intentions within a 30-day period ending March 31, 1961, or ending on such earlier date as may be determined by CCC. Producers who elect to sell tung oil under a purchase agreement must notify the county committee of their intentions within the 30-day period ending October 31, 1961, or ending on such earlier date as may be determined by CCC.

§ 443.109 Applicable forms.

The approved forms consist of the purchase agreement forms, loan forms, and such other forms and documents as may be required, which together with the provisions of this bulletin, and any supplements and amendments hereto, govern the rights and responsibilities of the producer. Note and loan agreements must have State documentary and revenue stamps affixed thereto when required by law. Purchase agreement or loan documents executed by an administrator, executor, or trustee, will be acceptable only where legally valid.

(a) *Purchase agreement documents.* The purchase agreement forms shall

consist of the Purchase Agreement, Form CP-1; Commodity Delivery Notice, Form CCC Grain 50; Purchase Agreement Settlement, Form CP-4; Lien Waiver for Purchases, Form CP-5; and other applicable forms prescribed in paragraph (c) of this section.

(b) *Loan documents.* Loan forms shall consist of the Producer's Note and Loan Agreement, Form CL-B (Non-recourse), and other applicable forms prescribed in paragraph (c) of this section.

(c) *Other forms.* Warehouse receipts, chemical analysis certificates issued by approved chemists, certification of eligibility of tung oil, producer's designation of agent, and such other forms as may be prescribed by CCC.

(d) *Producer's certification of eligibility of tung oil.* Before a loan is made on tung oil to a producer, other than a cooperative, or before delivery of tung oil from such producer under a purchase agreement can be accepted by the county committee, the producer, or his agent designated as provided in paragraph (f) of this section, must sign a statement in substantially the following form:

I hereby certify:

(1) That the _____ pounds of tung oil stored at _____

(Name and address of storage facility) which I am pledging to CCC as collateral for loan or am tendering for delivery to CCC under purchase agreement was delivered to me as oil processed for my account by _____

(Name of mill) out of _____ tons of 1960 crop tung nuts produced by me which I delivered to such plant for toll processing:

(2) That the beneficial interest in such tung nuts and in the resultant tung oil described above is and always has been in me or in me and a former producer whom I succeeded either as landowner, landlord, tenant, or share-cropper, before such tung nuts were harvested.

(f) *Designation of agent by a producer or group of producers.* A single eligible producer may designate an agent to act in his behalf in obtaining price support, or two or more eligible producers may designate an agent to act in their joint behalf in obtaining price support. In such event the producer or group of producers shall execute a form substantially equivalent to CCC Tung Nut Form 1 for purchase agreements or to CCC Tung Nut Form 1-A for loans. A copy of each designation of agent signed by the producer(s) and indicating the maximum quantity of eligible tung nuts which the producer (or each producer in the case of a group) will produce on the producer's own farm, and on which price support is desired, must be delivered to the county office before any purchase agreement or loan documents filed by the agent on behalf of such producer(s) are approved. A separate certification of eligibility must be executed for or on behalf of each producer.

(g) *Warehouse receipts.* Warehouse receipts representing tung oil in approved warehouse storage to be placed under loan or to be delivered under a purchase agreement, must:

(1) Be signed by the warehouseman, or his authorized representative, and be properly endorsed in blank by the producer so as to vest title in the holder;

(2) Show the location of the warehouse;

(3) State the quantity of tung oil guaranteed by the warehouseman;

(4) Guarantee that the tung oil when delivered out by the warehouse, will meet Federal Specification TT-T-775, "Tung Oil" dated May 28, 1957;

(5) State the date of issue;

(6) Set forth in its written terms that the tung oil is insured for not less than the full market value against loss by

fire, lightning, inherent explosion, wind-storm, cyclone, tornado, leakage and other hazards required by statute or insured against by the warehouseman;

(7) Be negotiable;

(8) Be issued in the name of the producer (in case of a cooperative, in the name of the producer delivering tung nuts or tung oil to it);

(9) Include a statement or endorsement in substantially the following form: "All warehouse charges (including insurance) through the storage season on the tung oil represented by this warehouse receipt have been paid or otherwise provided for, and the warehouseman has no lien upon the tung oil for such charges"; and

(10) Contain such other terms and conditions as CCC may require in tung oil storage agreement with approved warehouseman.

§ 443.110 Personal liability of the producer.

Any fraudulent representation made by any producer or agent of the producer in executing any of the purchase agreement or loan documents or in obtaining the purchase agreement or loan proceeds, or the conversion or unlawful disposition of any portion of the commodity by the producer, or agent of the producer, will render the producer or agent subject to criminal prosecution under Federal law and liable for any damages suffered by CCC as a result of purchase of the commodity, for the amount of the loan (including interest), and for any resulting expense incurred by any holder of the note.

§ 443.111 Determination of quantity.

(a) *Tung nuts.* The quantity of tung nuts delivered under purchase agreement shall be determined on the basis of net weight at point of delivery to CCC. The net weight is the gross scale weight less foreign material and bags.

(b) *Tung oil.* Where the tung oil pledged to secure a loan or tendered under a purchase agreement is represented by warehouse receipts issued by approved warehouses, the determination of quantity for purposes of settlement with the producer shall be based on the weight specified on such warehouse receipts. Where tung oil tendered under a purchase agreement is not stored in an approved warehouse, the quantity of such tung oil shall be determined on the basis of approved scale weight at destination.

§ 443.112 Determination of quality.

(a) The determination of the oil content of the tung nuts and the quality of tung oil not stored in approved warehouses which is delivered under purchase agreement shall be made on the basis of samples taken by inspectors authorized or licensed by the Secretary of Agriculture. The samples shall be analyzed by chemists approved by the Department of Agriculture (hereinafter referred to as "approved chemists"). The oil content of the tung nuts shall be determined on the basis of a sample drawn at the time of delivery of the tung nuts to CCC. The time of determining the quality of

tung oil and evidence of such quality shall be as provided in § 443.121(e). The cost of sampling and analysis shall be borne by the producer.

(b) In the case of tung oil stored in approved warehouses where appropriate warehouse receipts are delivered to CCC in connection with a purchase agreement or a loan on such tung oil, the quality of such tung oil for the purposes of settlement with the producer shall be the quality shown on the warehouse receipts.

§ 443.113 Liens.

If there are any liens or encumbrances on the tung nuts or tung oil, waivers acceptable to the county committee must be obtained.

§ 443.114 Service charges.

Producers shall pay to the county committee service charges on the quantity of of the commodity placed under loan or specified in the purchase agreement, computed at the following rates:

	Rates	Minimum charges
Tung oil.....	6 cents per cwt.....	\$1.50
Tung nuts.....	18 cents per ton.....	1.50

No service charges will be refunded.

§ 443.115 Insurance.

Tung oil tendered for loan or under purchase agreement which is stored in an approved warehouse on a commingled basis must be insured by the warehouseman for not less than the full market value against the hazards specified in § 443.109(g) (6).

§ 443.116 Set-offs.

(a) If any installment or installments on any loan made available by CCC on farm storage facilities or mobile drying equipment are payable, under the provisions of the note evidencing such loan, out of any amount due the producer under the program provided for in this subpart, the producer must designate CCC or the lending agency holding such note as payee of such amount to the extent of such installments, but not to exceed that portion of the amount remaining after deduction of service charges and amounts due prior lienholders.

(b) If the producer is indebted to CCC, or if the producer is indebted to any other agency of the United States, and such indebtedness is listed on the county debt record, amounts due the producer under the program provided for in this subpart, after deduction of amounts payable on farm storage facilities or mobile drying equipment and other amounts provided in paragraph (a) of this section, shall be applied, as provided in the Secretary's Set-off Regulations 7 CFR Part 13 (23 F.R. 3757), to such indebtedness.

(c) Compliance with the provisions of this section shall not deprive the producer of any right he might otherwise have to contest the justness of the indebtedness involved in the set-off action

either by administrative appeal or by legal action.

§ 443.117 Interest rate.

Loans shall bear interest at the rate of 3.5 percent per annum from the date of disbursement to the date of repayment, except that where there has been a fraudulent representation by the producer in the loan documents or in obtaining the loan, the loan shall bear interest at the rate of 6 percent per annum from the date of disbursement of the loan.

§ 443.118 Transfer of producer's right or equity.

(a) *Loans.* The producer shall not transfer either his remaining interest in or his right to redeem tung oil pledged as security for a loan, nor shall any one acquire such interest or right. Warehouse receipts will be released only to the producer or his authorized agent as provided in § 443.119.

(b) *Purchase agreements.* The producer may not assign his interest in a purchase agreement.

§ 443.119 Release of tung oil under loan.

A producer may at any time on or before maturity obtain release of the tung oil under loan by paying to CCC the principal amount of the note, plus charges and accrued interest. All charges in connection with the collection of the note shall be paid by the producer. Partial release prior to maturity may be arranged with the county committee by paying the amount of the loan represented by the quantity of the tung oil to be released plus charges and accrued interest. However, the quantity to be released must be equal to the quantity covered by one or more warehouse receipts. Warehouse receipts redeemed by repayment shall be released only to the producer or to another whom the producer has authorized in writing to receive the warehouse receipts as his agent.

§ 443.120 Foreclosure.

Upon maturity and non-payment of a tung oil loan the holder of the note is authorized to remove the collateral tung oil from storage and to sell, assign, transfer, and deliver the collateral tung oil or documents evidencing title thereto at such time, and in such manner, and upon such terms as the holder of the note may determine, at public or private sale. Disposition may also be made without removing the tung oil from storage. The holder of the note may become the purchaser of all or any part of the collateral. If, upon maturity and nonpayment of the loan, CCC is the holder of the note, then, at CCC's election, title to the unredeemed collateral tung oil shall, without a sale thereof, immediately vest in CCC, and CCC shall have no obligation to pay for any market value which such collateral may have in excess of the loan indebtedness, including interest and charges. Nothing herein shall preclude paying to the producer, or his personal representative only, without right of assignment to or substitution of any other party, the

amount by which the proceeds of sale may exceed the loan indebtedness if the collateral is sold to third parties rather than CCC acquiring title to such collateral.

§ 443.121 Delivery and payment under purchase agreement.

(a) A producer who signs a purchase agreement, Form CP-1, will not be obligated to sell any specified quantity of tung nuts or tung oil to CCC but shall have the option subject to paragraphs (d) and (e) of this section of delivering to CCC at the support price any quantity of tung nuts or tung oil within the maximum specified in the purchase agreement executed by him.

(b) A producer who has signed a purchase agreement in terms of tung nuts may, at his option, deliver in lieu of tung nuts not in excess of the quantity of eligible tung oil which has been processed from such tung nuts: *Provided*, That such tung oil shall be delivered in accordance with paragraphs (d) or (e) of this section, whichever is applicable.

(c) Eligible tung nuts will be purchased on the basis of the net weight and the oil content as shown by a chemical analysis. CCC will not accept delivery until a determination of eligibility has been made and a sample for chemical analysis has been drawn. The producer shall deliver tung nuts to CCC in accordance with instructions issued by the county committee on or after March 31, 1961. If the producer is required by such instructions to make delivery to a point more distant from the farm than his usual milling point, CCC will pay the difference, if any, between the cost of transportation from the farm to the designated delivery point and the cost of transportation from the farm to the usual milling point but not in excess of an amount which the county committee determines is a reasonable difference in cost for such services. The producer must complete delivery of tung nuts within a 15-day period immediately following the date the county committee issues delivery instructions unless the county committee determines that more time is needed for delivery.

(d) In the case of tung oil stored in approved storage facilities, the producer must, not later than the day following the final date of the 30-day notification period prescribed in § 443.108(b), or during such period of time thereafter as may be specified by CCC, submit to the county committee warehouse receipts issued in the form prescribed in § 443.109(g). The total quantity of oil represented by such warehouse receipts shall not exceed the quantity shown on Commodity Purchase Form 1. CCC will not accept a delivery of less than the total quantity of tung oil covered by a warehouse receipt. The certification of the eligibility of tung oil, as provided in § 443.109 (d) or (e), whichever is applicable, must accompany the warehouse receipt.

(e) In the case of tung oil stored in storage facilities which have not been approved, delivery will be accepted only f.o.b. tank cars at the producer's usual milling point or at other locations approved by CCC. The county committee

will on or after the final date of the 30-day notification period prescribed in § 443.108(b), issue delivery instructions to the producer. Before issuance of such delivery instructions, the producer must submit a chemical analysis certificate (issued by an approved chemist) covering each tank car offered showing that oil meets Federal Specifications; or if it is found by the county committee that a submission of these analysis certificates on tank car lots would cause undue delay in shipment, the producer may (1) submit evidence that a sample of each car lot of oil has been properly drawn and submitted to an approved chemist for analysis; *Provided*, That the producer (i) waives his right of appeal of the findings of the approved chemist, (ii) agrees that demurrage incurred as a result of delay in receiving the chemical analysis prior to final acceptance, shall be for the producer's account, and (iii) agrees further that if the tung oil does not meet Federal Specifications the car shall be rejected with all freight, demurrage, and handling charges reverting to the account of the producer; or (2) the producer may submit chemical analysis certificates (issued by an approved chemist) showing that the tung oil offered meets Federal Specifications and is stored in sealed identity preserved tanks, provided that the producer agrees to have such tung oil checkloaded by a representative of CCC into tank cars for delivery to CCC and to bear all handling and other costs prior to acceptance by CCC f.o.b. tank cars. The producer must submit a certification of the eligibility of tung oil, as provided in § 443.109(d) or (e), whichever is applicable, and complete delivery within a 15-day period immediately following the date the county committee issues delivery instructions unless the county committee determines that more time is needed for delivery. Notwithstanding the above provisions of this section, delivery of less than tank car lots may be accepted by CCC f.o.b. tank truck or other conveyance in those cases where the Dallas CSS Commodity Office determines that such action is in the interest of CCC. The tung nuts or tung oil will be purchased by CCC at the applicable support rate and payment will be made by sight drafts drawn on CCC by the ASC county office.

§ 443.122 Storage and handling charges.

(a) *Tung nuts*. CCC will not pay or assume any of the costs of transportation (except as provided in § 443.121(c)), storage, cleaning, insurance premiums, bags and bagging, sampling, testing and analysis reports and tagging accruing prior to delivery of the tung nuts to CCC under a purchase agreement, nor will CCC assume the cost of handling or processing expenses which are necessary to prepare the tung nuts to meet eligibility requirements.

(b) *Tung oil*. CCC will not pay or assume the cost of transportation, sampling, insurance, testing and analysis accruing on the tung oil prior to delivery under a purchase agreement or prior to the maturity date of the loan on tung oil placed under loan, nor will CCC pay

or assume any handling or processing charges which are necessary to prepare the tung oil to meet eligibility requirements. Storage charges on tung oil stored in approved warehouses shall be paid by the producer through October 31, 1961. Storage charges accruing on such tung oil after such date will be for the account of CCC. All storage charges on tung oil stored in unapproved warehouses shall be for the account of the producer.

(c) *Unexpired storage time and services*. CCC and any subsequent holder of warehouse receipts covering tung oil shall be entitled to any unexpired portion of the storage time and outloading services to which the producer became entitled under any contract between the producer and the warehouseman.

§ 443.123 Support prices.

(a) *Tung nuts*. The support price for tung nuts containing 18.5 percent oil (basis 15 percent moisture) shall be \$53.50 per ton in all areas. This price shall be adjusted upward or downward by 30 cents per ton for each variation of $\frac{1}{10}$ of 1 percent oil from the base of 18.5 percent oil content (basis 15 percent moisture) on the basis of chemical analysis certificates issued by an approved chemist.

(b) *Tung oil*. The equivalent price for eligible tung oil will be 20.9 cents per pound in all areas.

§ 443.124 CSS Commodity Office.

The Dallas CSS Commodity Office, 500 South Ervay Street, Dallas 1, Texas, will serve the tung area.

Issued this 28th day of September 1960.

FOREST W. BEALL,
Acting Executive Vice President,
Commodity Credit Corporation.

Title 14—AERONAUTICS AND SPACE

Chapter III—Federal Aviation Agency

SUBCHAPTER E—AIR NAVIGATION REGULATIONS

[Airspace Docket No. 60-NY-19]

PART 601—DESIGNATION OF THE CONTINENTAL CONTROL AREA, CONTROL AREAS, CONTROL ZONES, REPORTING POINTS, AND POSITIVE CONTROL ROUTE SEGMENTS

Designation of Control Area Extension

On July 8, 1960, a notice of proposed rule making was published in the FEDERAL REGISTER (25 F.R. 6439) stating that the Federal Aviation Agency proposed to designate a control area extension at Staunton, Va.

No adverse comments were received regarding the proposed amendment.

Interested persons have been afforded an opportunity to participate in the mak-

ing of the rule herein adopted, and due consideration has been given to all relevant matter presented.

The substance of the proposed amendment having been published, therefore, pursuant to the authority delegated to me by the Administrator (24 F.R. 4530) and for the reasons stated in the notice, the following action is taken: In part 601 (14 CFR Part 601), § 601.1220 is added to read:

§ 601.1220 Control area extension (Staunton, Va.).

That airspace bounded on the SW, NW and NE by a line extending from a point on the N boundary of VOR Federal airway No. 140 at latitude 37°58'00" N., longitude 79°08'45" W., to latitude 38°06'30" N., longitude 79°13'45" W.; thence to latitude 38°25'00" N., longitude 79°00'45" W.; thence to the N boundary of VOR Federal airway No. 140 at latitude 38°15'15" N., longitude 78°39'45" W.; bounded on the SE by the N boundary of VOR Federal airway No. 140.

This amendment shall become effective 0001 e.s.t. December 15, 1960.

(Sec. 307(a), 72 Stat. 749; 49 U.S.C. 1348)

Issued in Washington, D.C., on September 27, 1960.

GEORGE S. CASSADY,
Brig. Gen., U.S. Air Force, Acting
Director, Bureau of Air
Traffic Management.

[Airspace Docket No. 60-WA-218]

PART 601—DESIGNATION OF THE CONTINENTAL CONTROL AREA, CONTROL AREAS, CONTROL ZONES, REPORTING POINTS, AND POSITIVE CONTROL ROUTE SEG- MENTS

Modification of Control Area Extension; Designation and Modification of Reporting Points

The purpose of these amendments to §§ 601.1226, 601.5001 and 601.7001 of the regulations of the Administrator is to delete the name "Nan-Love route" from the caption of the Grand Isle, La., control area extension, to revoke associated compulsory reporting points, Nan-Love One and Nan-Love Two, and to designate new reporting points to replace the above reporting points.

Two letter designations are used to identify oceanic routes. Since Control Area 1226 is a part of domestic control, the name "Nan-Love route" should be deleted from the description of Control Area 1226. The Federal Aviation Agency has determined that two new reporting points to replace Nan-Love One and Nan-Love Two are required for air traffic management purposes. Flight progress reports over designated locations, automatically initiated by pilots, will facilitate air traffic management and assist the controller in the performance of his duties. Thus, the actions taken herein reflect these changes.

Since these amendments are of a procedural nature and do not assign or reassign the use of navigable airspace, compliance with the notice and public procedure of the Administrative Procedure Act is unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, these amendments will become effective more than 30 days after publication.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (24 F.R. 4530), the following actions are taken:

1. In the caption of § 601.1226 (14 CFR 601.1226) ("*Grand Isle, La.*) (*Nan-Love route*)" is deleted and ("*Grand Isle, La.*)" is substituted therefor.

2. In the text of § 601.5001 (14 CFR 601.5001), the following changes are made:

(a) "Nan-Love 1 Intersection: The intersection of a 103° True bearing from the Grand Isle, La., nondirectional radio beacon and a 175° True bearing from the Pensacola, Fla. (PNS) radio range station." is deleted.

(b) "Nan-Love 2 intersection: The intersection of a 285° True bearing from the Egmont Key, Fla., nondirectional radio beacon and a 229° True bearing from the Cross City, Fla., radio range station." is deleted.

(c) "Neptune INT: The INT of a 284° True bearing to the Grand Isle, La., RBN and a 018° True bearing to the Pensacola, Fla., RR." is added.

(d) "Crab INT: The INT of a 007° True bearing to the Tallahassee, Fla., RR and the 104° True bearing to the Egmont Key, Fla., RBN." is added.

3. In the text of § 601.7001 (14 CFR 601.7001), the following are added:

(a) "Neptune INT: The INT of the Crestview, Fla., VOR 206° True and the New Orleans, La., VORTAC 122° True radials."

(b) "Crab INT: The INT of the St. Petersburg, Fla., VORTAC 275° True and the Tallahassee, Fla., VORTAC 192° True radials."

These amendments shall become effective 0001 e.s.t. December 15, 1960.

PART 601—DESIGNATION OF THE CONTINENTAL CONTROL AREA, CONTROL AREAS, CONTROL ZONES, REPORTING POINTS, AND POSITIVE CONTROL ROUTE SEG- MENTS

Modification of Control Zone

On June 17, 1960, a notice of proposed rule making was published in the FED-

ERAL REGISTER (25 F.R. 5455) stating that the Federal Aviation Agency proposed to modify the Harlingen, Tex., control zone by designating an additional extension extending from the 5-mile radius zone to the VOR, and by redesignating the existing extension to terminate at the Harlingen AFB radio beacon.

No adverse comments were received regarding the proposed amendment. The Air Transport Association concurred in the action proposed as it relates to Harlingen AFB, but strongly recommended that the control zone be further modified to encompass Harlingen, Tex., Richards Airport. The ATA further stated that, if existing communications facilities were inadequate to permit placing Richards Airport in the Harlingen control zone, the FAA should take the earliest possible action to provide the necessary facilities. It is true that the FAA does not have the required communications capability to include Richards Airport in a control zone. However, the air traffic activity at this airport is not sufficient at this time to warrant the designation of a control zone, nor to justify the establishment of the required facilities and services. All air traffic activity is regularly monitored by the FAA, and at such time as the traffic at Richards Airport may indicate the requirement, the necessary communications and weather reporting service shall be programed and a further modification to the Harlingen control zone to include this airport will be proposed.

Interested persons have been afforded an opportunity to participate in the making of the rule herein adopted, and due consideration has been given to all relevant matter presented.

The substance of the proposed amendment having been published, therefore, pursuant to the authority delegated to me by the Administrator (24 F.R. 4530) and for the reasons stated in the Notice, § 601.2404 (14 CFR 601.2404) is amended to read:

§ 601.2404 Harlingen, Tex., control zone.

Within a 5-mile radius of the Harlingen Air Force Base (latitude 26°13'30" N., longitude 97°39'05" W.), within 2 miles either side of the 179° True bearing from the Harlingen RBN extending from the 5-mile radius zone to the RBN, and within two miles either side of the 117° True radial of the Harlingen VOR extending from the 5-mile radius zone to the VOR.

This amendment shall become effective 0001 e.s.t. December 15, 1960.

Chapter I—Federal Communications Commission

[Docket No. 13080]

PART 42—PRESERVATION OF RECORDS OF COMMUNICATION COMMON CARRIERS

PART 45—PRESERVATION OF RECORDS OF TELEPHONE CARRIERS

PART 46—PRESERVATION OF RECORDS OF WIRE-TELEGRAPH, OCEAN-CABLE AND RADIOTELEGRAPH CARRIERS

The Commission having under consideration the matter of consolidating Parts 45 and 46 of the Commission's rules and regulations into a single new part; and

It appearing that the Commission in its Report and First Order in this matter, adopted on July 7, 1960, and published in the FEDERAL REGISTER on July 15, 1960 (25 F.R. 6688), has ordered that Parts 45 and 46 of the rules should be consolidated into a single new part, and that such consolidation should be accomplished at a later date by an Order to be issued by the Secretary of the Commission under delegated authority; and

It further appearing that the changes adopted herein are nonsubstantive revisions of the Commission's rules and regulations, editorial in nature; and

It further appearing that the changes adopted herein are issued pursuant to authority contained in sections 4(i), 5 (d) (1), and 220 of the Communications Act of 1934, as amended, and section 0.341(a) of the Commission's Statement of Organization, Delegations of Authority, and Other Information;

It is ordered, This 26th day of September 1960, that, effective December 31, 1960, Part 42, Preservation of Records of Communication Common Carriers, as set below, is hereby prescribed and promulgated as the regulations governing the preservation of records of communication common carriers, subject to the jurisdiction of this Commission, engaged in furnishing telephone, wire-telegraph, ocean-cable, or radiotelegraph service;

It is further ordered, That, effective December 31, 1960, Part 45, Preservation of Records of Telephone Carriers, and Part 46, Preservation of Records of Wire-Telegraph, Ocean-Cable, and Radiotelegraph Carriers, of the Commission's rules and regulations are hereby rescinded.

Released: September 27, 1960.

AUTHORITY: §§ 42.01 to 42.9 issued under sec. 4, 48 Stat. 1066, as amended, 47 U.S.C. 154. Interprets or applies sec. 220, 48 Stat. 1078, 47 U.S.C. 220.

APPLICABILITY

§ 42.01 Applicability.

This part is prescribed and promulgated as the regulations governing the preservation of records of communication common carriers, subject to the jurisdiction of the Commission, engaged in furnishing telephone, wire-telegraph, ocean-cable, or radiotelegraph service. As used in this part, the term "telephone carriers" refers to those carriers primarily engaged in furnishing telephone service and the term "telegraph carriers" refers to those carriers primarily engaged in furnishing wire-telegraph, ocean-cable, or radiotelegraph service.

GENERAL INSTRUCTIONS

§ 42.1 Scope of the regulations in this part.

(a) The regulations in this part apply to all accounts, records, memoranda, documents, papers, and correspondence prepared by or on behalf of the carrier as well as those which come into its possession in connection with the acquisition of property, such as by purchase, consolidation, merger, etc.

(b) The regulations in this part shall not be construed as requiring the preparation of accounts, records, or memoranda not required to be prepared by other regulations, such as the uniform systems of accounts, of the Commission.

(c) The regulations in this part shall not be construed as excusing compliance with any other lawful requirement for the preservation of records for periods longer than those prescribed in this part.

(d) Unless otherwise specified in § 42.9, duplicate copies of records may be destroyed at any time: *Provided, however*, That such duplicate copies contain no significant information not shown on the originals and that precautions have been taken to assure the continued retention of the originals (or one true copy) for the full period required under the regulations in this part. (See item 26 of § 42.9.)

(e) Records other than those listed in § 42.9 may be destroyed at the option of the carrier: *Provided, however*, That records which are used in lieu of those listed shall be preserved for the periods prescribed for records used for substantially similar purposes: *And provided further*, That retention of records pertaining to added services, functions, plant, etc., the establishment of which cannot be presently foreseen, shall conform with the principles promulgated in § 42.9.

§ 42.2 Designation of supervisory official.

Each carrier subject to the regulations in this part shall designate one or more officials to supervise the preservation and the authorized destruction of its records.

§ 42.3 Protection and storage of records.

The carrier shall protect records subject to the regulations in this part from damage from fires, floods, and other hazards and, in the selection of storage spaces, safeguard the records from unnecessary exposure to deterioration from excessive humidity, dryness, or lack of proper ventilation.

§ 42.4 Index of records.

At each office of the carrier where records are kept or stored, such records as are required by this part to be preserved shall be so arranged, filed, and currently indexed that they may be readily identified and made available to representatives of the Commission. In the general offices of the carrier a master index shall be available showing the physical location of the various classes of records, the periods to which such classes of records relate, and the locations, names, and titles of the custodians.

§ 42.5 Preservation of records on microfilm.

(a) Records may be microfilmed at any time and the microfilm retained in lieu of the original records, provided the procedures prescribed in paragraphs (b) to (f) of this section are followed.

(b) Prior to photographing, the records shall be so prepared, arranged, classified, and identified as readily to permit the subsequent location, examination, and reproduction of the photographs thereof. Any significant characteristic, feature, or other attribute of the original records which photography would not reflect clearly (e.g., that the record is a copy or that certain figures thereon are red) shall be so indicated on the records at the time of such arrangement, classification, and identification. When a number of the records to be microfilmed have in common such a characteristic or attribute, an appropriate notation identifying the characteristic or attribute may be indicated in a statement at the beginning of the roll of film instead of on each individual record.

(c) Each roll of film shall include a microfilm of a certificate or certificates stating that the photographs are direct and facsimile reproductions of the original records and that they have been made in accordance with prescribed instructions. Such certificate or certificates shall be executed by a person or persons having personal knowledge of the facts covered thereby.

(d) The photographic matter on each roll shall commence and end with a statement as to the nature and arrangement of the records reproduced, the name of the photographer, and the date. Rolls of film shall not be cut. Supplemental or retaken film, whether of misplaced or omitted documents or of portions of a film found to be spoiled or illegible or of other matter, shall be attached to the beginning of the roll, and in such event the aforementioned certificate or certificates shall cover also such supplemental or retaken film and shall state the reasons for taking such film.

(e) All film stock shall be of approved permanent-record microcopying type of 16 mm. or 35 mm. size, either perforated or unperforated, such as meets the mini-

Title 50—WILDLIFE**Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior****PART 32—HUNTING****Tamarac National Wildlife Refuge, Minnesota**

The following special regulation is issued.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.**MINNESOTA****TAMARAC NATIONAL WILDLIFE REFUGE**

Hunting of big game on the Tamarac National Wildlife Refuge, Minnesota, is permissible only under the following conditions:

(a) Species permitted to be taken: White-tailed deer and bear.

(b) Open season: Early bow and arrow season—from sunrise to sunset

October 1, 1960, through October 31, 1960. All legal firearms and bow and arrow season—from sunrise to sunset November 12, 1960, through November 16, 1960.

(c) Daily bag and possession limits: One deer of any age or sex. Bear—no limit.

(d) Methods of hunting: All hunting methods must be in accordance with State laws and regulations.

(e) Description of areas open to hunting: Hunting is permitted in accordance with (a) above on the posted area which comprises approximately 9,000 acres and 27 percent of the total refuge and which is described as follows:

Those lands under the jurisdiction of the Bureau of Sport Fisheries and Wildlife lying in Sections 13, 14, 15, 17, 18, 19, 20, 21, 22, 25, 28, 29, 30, 31 and 32, T. 140 N., R. 39 W., and in Sections 11, 13, 14, 23, 24, 25, 26, 35 and 36, T. 140 N., R. 40 W., 5th P. M.

(f) Other provisions:

(1) The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32.

(2) A Federal permit is not required to enter the public hunting area.

(3) The provisions of this special regulation are effective October 1, 1960, through November 16, 1960.

Title 7—AGRICULTURE**Chapter VIII—Commodity Stabilization Service (Sugar), Department of Agriculture****SUBCHAPTER G—DETERMINATION OF PROPORTIONATE SHARES**

[Sugar Determination 850.122, as amended, Supp. 1]

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA**Minnesota Proportionate Share Areas and Farm Proportionate Shares for 1960 Crop**

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), the Agricultural Stabilization and Conservation Minnesota State Committee has issued the bases and procedures for dividing the State into proportionate share areas and establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 79,148 acres and the supplemental allocation of 1,206 acres established for Minnesota or from any unused acreage redistributed to Minnesota. Copies of these bases and procedures are available for public inspection at the office of such Committee at Room 1104, Main Post Office Building, St. Paul, Minnesota, and

at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Minnesota. These bases and procedures incorporate the following:

§ 850.123 Minnesota.

(a) *Proportionate share areas.* Minnesota shall be divided into two proportionate share areas comprising the East Grand Forks-Crookston-Moorhead and the Chaska-Mason City beet sugar factory districts of the State. These areas shall be designated as the Northwest Area and the Southern Area, respectively. Acreage allotments of 64,142 and 15,006 acres, respectively, are established for these areas on the basis of the average accredited acreage for the crop years 1957 through 1959, as a measure of "past production" and "ability to produce" sugar beets, with pro rata adjustments to the State allocation of 79,148 acres.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from area allotments as follows: Northwest Area—320 acres for new producers, 1,514 acres for small producers, 642 acres for appeals and 0 acres for adjustments in initial shares; Southern Area—1,052 acres for new producers, 237 acres for small producers, 151 acres for appeals, and 0 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC county office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date for such filing, provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed, a fully completed Form SU-100 shall be filed by March 15, 1960, before a proportionate share may be established for the farm. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State committee determines that in any such case the farm operator was prevented from filing a completed form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(b) *Establishment of individual farm proportionate shares for old producers—*

(1) *Farm Bases.* If the 1960 operator of the farm is a tenant having a personal accredited acreage record for any of the crop years 1957 through 1959 (the base period), in the Northern Area, the 1960 base for the farm shall be the larger of the result of dividing by three the 1957 through 1959 accredited acreage record of the farm he will operate in 1960 (except that for each year for which a former tenant on such farm is credited with personal history acquired thereon, the farm record shall be limited to the landowner's share of the crop) or the result of dividing by three his total personal accredited acreage record for the years 1957 through 1959; and in the Southern Area, the 1960 farm base shall be the larger of the result of applying the above formula or the 1959 accredited acreage of the farm he will operate in 1960 but not in excess of the 1959-crop proportionate share originally

established for such farm. For each area the personal accredited acreage record of a 1960 tenant operator for a farm he operated in any year in the base period shall be reduced to the extent of the landlord's share of the acreage on such farm in such year if another operator requests a 1960 proportionate share based on such landowner's share of the acreage. However, if the 1960 operator of the farm is a tenant who was the operator of a farm at the time a new-producer share was established for it in 1958 or 1959, the 1960 farm base shall be the largest of the acreage resulting from dividing by three the total personal accredited acreage of such tenant for the years 1957-1959; the 1959-crop accredited acreage of the farm operated by him in 1959 but not to exceed the 1959-crop proportionate share originally established for such farm; or the landowner's share of the sugar beet acreage grown during the base period on the farm which such tenant will operate in 1960 divided by three. If the 1960 operator of the farm is the owner and he was the operator of such farm when a new-producer share was established for it in 1958 or 1959, the 1960 base for such farm shall be the larger of the acreage resulting from dividing by three the total accredited acreage record of the farm for the years 1958 and 1959, or the 1959-crop accredited acreage of the farm but not to exceed the 1959-crop proportionate share originally established for the farm. If the 1960 operator of the farm is a tenant without a personal accredited acreage record in the crop years 1957 through 1959, or is the owner of the farm, in the Northwest Area the 1960 base for the farm shall be determined by dividing by three that portion of the total accredited acreage record of such farm for the crop years 1957 through 1959 which represents the farm owner's share of such acreage; and in the Southern Area, the 1960 farm base shall be the larger of the result of applying the above formula or the 1959 accredited acreage of the farm he will operate in 1960 but not in excess of the 1959-crop proportionate share originally established for such farm. The landowner's share of sugar beet acreage grown on cash-rented land shall be deemed to be zero in each area. The personal accredited acreage history of sugar beet production of any partnership which was dissolved prior to the planting of the 1960 crop shall be credited to the individuals who were members of the partnership only to the extent of the acreage record contributed to such partnership by such individual at the time it was formed; *Provided, however,* That in the event any such dissolved partnership was in existence for at least three years, the acreage history of the partnership may be credited to each of the former partners in accordance with a written agreement signed by all of the former partners or their legal representatives.

(2) *Initial proportionate shares.* For each proportionate share area, the total of individual farm bases for old-producer farms, as established pursuant to this paragraph, is less than the area allotment minus the set-asides of acreage

established under paragraph (b) of this section and exclusive of the supplemental State allocation of 1,206 acres. Accordingly, initial proportionate shares shall be established from the farm bases as follows: For farms for which respective requested acreages are equal to or less than their farm bases, the initial shares shall coincide with requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the area allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph. The proration factor for each area shall be as follows: Northwest Area—1,028; and Southern Area—1,078.

(3) *Adjustments in initial shares.* From acreage of initial shares in excess of requested acreages in each proportionate share area, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, crop rotation, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator. The acreages set aside for small producers in each area and any acreage released prior to May 1, 1960, shall be used to increase the proportionate shares of all farms in such area for which the relatively smallest shares would otherwise be established and for which additional acreages are requested by taking into consideration the factors enumerated above so as to attain insofar as possible a common acreage level not to exceed 35 acres of sugar beets which is the acreage determined by the State Committee as the minimum economically feasible to plant in each area.

(e) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers in each proportionate share area, proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that a 35.0-acre share is the minimum acreage which is economically feasible to plant as a new-producer farm share. The acreage available for establishing new-producer shares shall be allotted in minimum economic units to individual counties within the Northwest Area, and in the Southern Area to the group of counties included in the Mason City factory area and to the group of counties in the Chaska factory area on the basis of total farm bases of old-producer farms in each county in the Northwest Area and the total farm bases of old-producer farms in each group of counties in the Southern Area. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new producer shares which are fair and equitable as to relative size among qualified farms, the State Committee, by taking into con-

sideration availability and suitability of land, availability of irrigation water, adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities shall rate each farm as provided in § 850.122(j), and shall establish new producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused in each proportionate share area, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122, applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage on farms in any county shall be reported to the ASC State Committee. Acreages released and reported after May 1, 1960, together with available acreages from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122(b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a Form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Minnesota State Committee for determining farm proportionate shares in Minnesota for the 1960 crop of sugar beets.

Minnesota is again divided into the same two areas. Informal relationships are maintained with grower and processor representatives. In establishing proportionate shares for old producers, the

factors of "past production" and "ability to produce" sugar beets are measured by applying a formula to accredited acreages for the crop years 1957-59, except that a more favorable formula is applied in cases involving new-producer shares in 1958 or 1959. Farm shares for new producers are established as provided in § 850.122.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Colorado Proportionate Share Areas and Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), the Agricultural Stabilization and Conservation Colorado State Committee has issued the bases and procedures for the dividing the State into proportionate share areas and establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 154,523 acres and the supplemental allocation of 2,355 acres established for Colorado, or from any unused acreage redistributed to Colorado. Copies of these bases and procedures are available for public inspection at the office of such Committee at the New Custom House, Denver, Colorado, and at the Offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Colorado. These bases and procedures incorporate the following:

§ 850.124 Colorado.

(a) *Proportionate share areas.* Colorado shall be divided into three proportionate share areas comprising the parts of the State included in the factory districts of the Great Western Sugar Company, the Rocky Ford-Sugar City-Swink factory districts, and the Delta factory district. These areas shall be designated Northern Area, Southern Area, and Western Area, respectively. Acreage al-

lotments of 126,209, 22,417 and 5,897 acres, respectively, are established for these areas on the basis of the average accredited acreage for the crop years 1956 through 1959 for each area as a measure of "past production" and "ability to produce" sugar beets, with pro rata adjustments to the State allocation of 154,523 acres.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from area allotments as follows: Northern Area—1,262 acres for new producers, 1,262 acres for small producers, 1,262 acres for appeals, and 8,075 acres for adjustments in initial shares; Southern Area—448 acres for new producers, 448 acres for appeals, and 1,530 acres for adjustments in initial shares; and Western Area—118 acres for new producers, 59 acres for appeals, and 316 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date for such filing, as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed, as provided in § 850.122, a fully-complete form SU-100 shall be filed by March 31, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(d) *Establishment of individual proportionate shares for old-producer farms—(1) Farm bases.* For each old-producer farm, a farm base shall be determined by dividing by four the total accredited acreage of sugar beets for the farm during the crop years 1956 through 1959, except that for any such farm for which a new-producer share was established for the 1957, 1958 or 1959 crop, the farm base shall be the larger of the 1956-59 average accredited acreage, or the 1959 accredited acreage for the farm but not in excess of the 1959-crop proportionate share originally established for the farm.

(2) *Initial proportionate shares.* For each proportionate share area, the total of individual farm bases for old-producer farms, as established pursuant to paragraph (d) of this section, is equal to or less than the area allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 2,355 acres. Accordingly, initial proportionate shares shall be established from the farm bases in each proportionate share area as follows: For farms for which respective requested acreages are equal to or less than their farm bases, the initial shares shall coincide with requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the area allotment less the prescribed set-asides and the total of the initial shares

established in accordance with the preceding part of this subparagraph. The proration factor for each area shall be as follows: Northern Area—1.00; Southern Area—1.02; and Western Area—1.05.

(3) *Adjustments in initial shares.* Within the acreage available from the set-aside for adjustments, and from acreage of initial shares in excess of requested acreages in each proportionate share area, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, crop rotation, availability of irrigation water, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator. The 1,262 acres set aside for small producers in the Northern Area shall be used to increase the proportionate shares of all farms in such area for which the relatively smallest shares would otherwise be established and for which additional acreages are requested, by taking into consideration the factors enumerated above so as to attain, insofar as possible, a common acreage level not to exceed 15 acres of sugar beets which is the acreage determined by the State Committee as the minimum economically feasible to plant in each area.

(e) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers in each proportionate share area, proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that a 15.0-acre share is the minimum acreage which is economically feasible to plant as a new-producer farm share. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms, the county committee, subject to review by the State Committee, by taking into consideration availability and suitability of land, availability of irrigation water (where irrigation is used), adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm as provided in § 850.122(j), and shall establish new-producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused in each proportionate share area, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122, applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop

season by underplanting or failure to plant proportionate share acreage on farms in any county shall be reported to the ASC State Committee. Acreages released and so reported, together with available acreages from unused set-asides, from other sources of unused acreage or from any acreage made available pursuant to § 850.122(b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Colorado State Committee for determining farm proportionate shares in Colorado for the 1960 crop of sugar beets.

Colorado is again divided into the same three areas. Informal relationships are maintained with grower and processor representatives. In establishing proportionate shares for old-producer farms, the factors of "past production" and "ability to produce" sugar beets are measured by four-year average accredited acreages for the crop years 1956-59, except that a more favorable formula is applied to such farms which were new-producer farms in 1957-59.

Farm shares for new producers are established as provided in § 850.122. Fifteen-acre shares are determined to be minimum economic units for new-producer farms.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals, are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Wisconsin Farm Proportionate Shares For 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), the Agricultural Stabilization and Conservation Wisconsin State Committee has issued the bases and procedures for establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 9,174 acres and the supplemental allocation of 140 acres established for Wisconsin. Copies of these bases and procedures are available for public inspection at the office of such committee at 3010 E. Washington Avenue, Madison, Wisconsin, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Wisconsin. These bases and procedures incorporate the following:

§ 850.125 Wisconsin.

(a) *Proportionate share area.* In the establishment of individual farm proportionate shares the State shall be deemed to be one allotment area.

(b) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date for such filing, as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed, as provided in § 850.122, a fully-completed form SU-100 shall be filed by May 17, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed form SU-100 by such dates because of absence, illness, or other reasons beyond his control.

(c) *Establishment of individual farm proportionate shares.* Inasmuch as the total acreages requested by old producers and potential new producers by the closing date of March 18, 1960, are significantly less than 9,174 acres, the set-asides of acreage for new producers and appeals, the establishment of individual farm bases for old producers, the factoring of such bases to establish initial shares for old producers, the adjustment

of initial shares, and the establishment of new-producer shares through the consideration of specific factors are unnecessary and the shares for both old and new producers shall be established so as to coincide with the requested acreages.

(d) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage on farms shall be reported to the ASC State Committee. Acreages so reported or from the supplemental allocation of 140 acres for Wisconsin shall be pro-rated insofar as practicable to farms in the area on which it may develop subsequently that additional acreages can be used.

(e) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop. In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(f) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(g) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Wisconsin State Committee for determining farm proportionate shares in Wisconsin for the 1960 crop of sugar beets.

The total acreage requested as proportionate shares within the State by the closing date for filing requests is smaller than the State allocation. This situation makes unnecessary the carrying out of detailed procedure which would otherwise be required. It is unnecessary to make set-asides of acreage for new producers and appeals, to apply a specific formula in computing farm shares, and to make adjustments in farm shares to reflect ability to produce. Accordingly, this supplement provides for the initial distribution of acreage within the State allocation on the basis of requested acreages and it also provides for the subsequent distribution of unused acreages.

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Illinois Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574; 4427, 7357, 8067), the Agricultural Stabilization and Conservation Illinois State Committee has issued the bases and procedures for establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 2,102 acres and the supplemental allocation of 32 acres established for Illinois. Copies of these bases and procedures are available for public inspection at the office of such committee at Room 232, U.S. Post Office and Court House, Springfield, Illinois, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Illinois. These bases and procedures incorporate the following:

§ 850.126 Illinois.

(a) *Proportionate share areas.* In the establishment of individual farm proportionate shares the State shall be deemed to be one allotment area.

(b) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date for such filing, as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed, as provided in § 850.122, a fully-completed form SU-100 shall be filed by May 17, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(c) *Establishment of individual farm proportionate shares.* Inasmuch as the total acreages requested by old producers and potential new producers by the closing date of March 18, 1960, are significantly less than 2,102 acres, the set-asides of acreage for new producers

and appeals, the establishment of individual farm bases for old producers, the factoring of such bases to establish initial shares for old producers, the adjustment of initial shares, and the establishment of new-producer shares through the consideration of specific factors are unnecessary and the shares for both old and new producers shall be established so as to coincide with the requested acreages.

(d) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage on farms shall be reported to the ASC State Committee. Acreages so reported or from the supplemental allocation of 32 acres for Illinois shall be prorated insofar as practicable to farms in the area on which it may develop subsequently that additional acreages can be used.

(e) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop. In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(f) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(g) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Illinois State Committee for determining farm proportionate shares in Illinois for the 1960 crop of sugar beets.

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Michigan Proportionate Share Areas and Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574; 4427, 7357, 8067), the Agricultural Stabilization and Conservation Michigan State Committee has issued the bases and procedures for dividing the State into proportionate share areas and establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 83,265 acres and the supplemental allocation of 1,269 acres established for Michigan. Copies of the these bases and procedures are available for public inspection at the office of such committee at 1405 South Harrison Street, East Lansing, Michigan, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Michigan. These bases and procedures incorporate the following:

§ 850.128 Michigan.

(a) *Proportionate share area.* Michigan shall be divided into four proportionate share areas comprising the parts of the State included in the factory districts of the Michigan Sugar Company, Monitor Sugar Division of Robert Gage Coal Co., Northern Ohio Sugar Co., and Buckeye Sugars, Inc. These areas shall be designated Michigan Area, Monitor Area, Northern Ohio Area, and Buckeye Area, respectively. Acreage allotments of 58,389, 21,353, 2,468, and 1,055 acres respectively, are established for these areas on the basis of the average accredited acreage for the crop years 1957 through 1959 as a measure of "past production" and "ability to produce" sugar beets, with pro-rata adjustments to the State allocation of 83,265 acres. However, in no area shall the 1960 acreage allotment be less than its 1959 accredited acreage.

(b) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before

the closing date for such filing, as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed, as provided in § 850.122 a fully-completed form SU-100 shall be filed by April 13, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(c) *Establishment of individual farm proportionate shares.* Inasmuch as the total acreages requested by old producers and potential new producers by the closing date of February 12, 1960, are significantly less than 83,265 acres, the set-asides of acreage for new producers and appeals, the establishment of individual farm bases for old producers, the factoring of such bases to establish initial shares for old producers, the adjustment of initial shares, and the establishment of new-producer shares through the consideration of specific factors are unnecessary and the shares for both old and new producers shall be established so as to coincide with the requested acreages.

(d) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage on farms in any county shall be reported to the ASC State Committee. Acreages so reported from counties in an area, from the supplemental allocation of 1,269 acres for Michigan or from other sources of unused acreage, shall be prorated insofar as practicable on the basis of total established shares to the various beet sugar factory districts of the area wherein additional acreage may be used. In each such district, the acreage shall be prorated insofar as practicable to farms on which additional acreage may be utilized. Any such acreage remaining unused in the district shall then be prorated by the ASC State Committee to other districts in the area with farms capable of utilizing more proportionate share acreage, and if such acreage is not utilized within the area, it may be made available by such Committee to other areas in the State wherein additional acreage may be used.

(e) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop. In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for

the purpose of payment under the Sugar Act of 1948, as amended.

(f) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(g) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Michigan State Committee for determining farm proportionate shares in Michigan for the 1960 crop of sugar beets.

The total acreage requested as proportionate shares within the State by the closing date for filing requests is smaller than the State allocation. This situation makes unnecessary the carrying out of detailed procedure which would otherwise be required. It is unnecessary to make set-asides of acreage for new producers and appeals, to apply a specific formula in computing farm shares, and to make adjustments in farm shares to reflect ability to produce. Accordingly, this supplement provides for the initial distribution of acreage within the State allocation on the basis of requested acreages and it also provides for the subsequent distribution of unused acreages.

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Nevada Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), the Agricultural Stabilization and Conservation Nevada State Committee has issued the bases and procedures for establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 584 acres and the supplemental allocation of 9 acres established for Nevada, or from any unused acreage redistributed to Nevada. Copies of these bases and procedures are available for public inspection at the office of the Agricultural Stabilization and Conservation Committee, 1479 Wells Avenue, Reno, Nevada. These bases and procedures incorporate the following:

§ 850.129 Nevada.

(a) *Proportionate share area.* In the establishment of individual farm proportionate shares, the State shall be deemed to be one allotment area.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from the State acreage allocation as follows: 60 acres for new producers, 6 acres for appeals, and 50 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date, for such filing as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed as provided in § 850.122, a fully-completed Form SU-100 shall be filed by April 12, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed Form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(d) *Establishment of individual proportionate shares for old-producer farms—(1) Farm bases.* For each old-producer farm, a farm base shall be determined by dividing by three the total accredited acreage of sugar beets for the farm during the crop years 1957 through 1959, except that for any such farm for which a new-producer share was established for the 1958 or 1959 crop, the farm base shall be the larger of the 1957-59 average accredited acreage or the 1959 accredited acreage for the farm but not in excess of the 1959-crop proportionate share originally established for such farm.

(2) *Initial proportionate shares.* The total of individual farm bases for old-producer farms in the State, as established pursuant to this paragraph, is less than the area allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 9 acres. Accordingly, initial proportionate shares shall be established from farm bases as follows: For farms for which respective requested acreages are equal to or less than their farm bases, the initial shares shall be computed by prorating to such farms in accordance with their respective bases, the area allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph. The proration factor for the area shall be 1.77.

(3) *Adjustments in initial shares.* Within the acreage available from the set-aside for adjustments, and from acreages of initial shares in excess of requested acreages, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, crop rotation, avail-

ability of irrigation water, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator.

(e) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers, proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that a 10.0 acre share is the minimum acreage which is economically feasible to plant as a new-producer farm share. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms, the State Committee, by taking into consideration availability and suitability of land, availability of irrigation water, adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm, as provided in § 850.122 paragraph (j), and shall establish new producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122, applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage, together with acreage from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122(b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals, or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a Form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in

this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Nevada State Committee for determining farm proportionate shares in Nevada for the 1960 crop of sugar beets.

Informal relationships are maintained with grower and processor representatives. In establishing proportionate shares for old producers, the factors of "past production" and "ability to produce" sugar beets are measured by the average accredited acreages for the crop years 1957-59 for farms, except that a more favorable formula is applied to such farms which were new-producer farms in 1958-59. Farm shares for new producers are established as provided in § 850.122. Ten-acre shares are determined to be minimum economic units for new-producer farms.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

New Mexico Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067) the Agricultural Stabilization and Conservation New Mexico State Committee has issued the bases and procedures for establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 825 acres and the supplemental allocation of 13 acres established for New Mexico, or from any unused acreage redistributed to New Mexico. Copies of these bases and procedures are available for public inspection at the office of such committee at 517 Gold Avenue SW., Albuquerque, New Mexico, and at the office of the Agricultural Stabilization and Conservation Committee in Estancia, Torrance County, New Mexico.

These bases and procedures incorporate the following:

§ 850.130 New Mexico.

(a) *Proportionate share area.* In the establishment of individual farm proportionate shares, the State shall be deemed to be one allotment area.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from the State acreage allocation as follows: 100 acres for new producers, 9 acres for appeals, and 50 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date, for such filing as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed as provided in § 850.122, a fully completed Form SU-100 shall be filed by April 13, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed Form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(d) *Establishment of individual proportionate shares for old-producer farms—(1) Farm bases.* For each old-producer farm, a farm base shall be determined by dividing by three the total accredited acreage of sugar beets for the farm during the crop years 1957 through 1959, except that for any such farm for which a new-producer share was established for the 1958 or 1959 crop, the farm base shall be the larger of the 1957-59 average accredited acreage or the 1959 accredited acreage for the farm but not in excess of the 1959-crop proportionate share originally established for such farm.

(2) *Initial proportionate shares.* The total of individual farm bases for old-producer farms in the State, as established pursuant to this paragraph, is less than the area allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 13 acres. Accordingly, initial proportionate shares shall be established from farm bases as follows: For farms for which respective requested acreages are equal to or less than their farm bases, the initial shares shall coincide with the requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the area allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph. The proration factor for the area shall be 1.2316.

(3) *Adjustments in initial shares.* Within the acreage available from the set-aside for adjustments, and from acreage of initial shares in excess of requested acreages, adjustments shall be made in initial farm proportionate

shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, crop rotation, availability of irrigation water, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator.

(e) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers, proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that a 10.0-acre share is the minimum acreage which is economically feasible to plant as a new-producer farm share. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms, the State Committee, by taking into consideration availability and suitability of land, availability of irrigation water (where irrigation is used), adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm, as provided in § 850.122(j), and shall establish new-producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122, applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage shall be reported to the ASC State Committee. Acreages released and so reported together with acreage from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122, (b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals, or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a Form SU-103-B specifying that

such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation New Mexico State Committee for determining farm proportionate shares in New Mexico for the 1960 crop of sugar beets.

Informal relationships are maintained with grower and processor representatives. In establishing proportionate shares for old producers, the factors of "past production" and "ability to produce" sugar beets are measured by three-year average accredited acreages for the crop years 1957-59, except that a more favorable formula is applied to such farms which were new-producer farms in 1958-59. Farm shares for new producers are established as provided in § 850.122.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

[Sugar Determination 850.122, as amended Supp. 9]

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Ohio Proportionate Share Areas and Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), the Agricultural Stabilization and Conservation Ohio State Committee has issued the bases and procedures for dividing the State into proportionate share areas and establishing

individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 23,711 acres and the supplemental allocation of 361 acres established for Ohio, or from any unused acreage redistributed to Ohio. Copies of these bases and procedures are available for public inspection at the office of such Committee at Room 202, Old Federal Building, Columbus, Ohio, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Ohio. These bases and procedures incorporate the following:

§ 850.131 Ohio.

(a) *Proportionate share areas.* Ohio shall be divided into two proportionate share areas or districts comprising the farms served by two beet sugar companies. These areas shall be designated "Northern Ohio District" and "Buckeye District", respectively. Acreage allotments of 16,734 and 6,977 acres, respectively are established for these districts on the basis of the average accredited acreage for each district for the crops of 1955 through 1957 factored to the 1960 State allocation of 23,711 acres, with the 1959-crop allotment for each district constituting a floor for the effective allotment.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from district allotments as follows: Buckeye District—581 acres for new producers, 70 acres for appeals, and 1,306 acres for adjustments in initial shares; and Northern Ohio District—513 acres for new producers, 168 acres for appeals, and 2,538 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date for such filing, as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed, as provided in § 850.122, a fully completed Form SU-100 shall be filed by April 13, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed Form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(d) *Establishment of individual proportionate shares for old-producer farms—(1) Farm bases.* For each old-producer farm, a farm base shall be determined by dividing by three the total accredited acreage of sugar beets for the farm during the crop years 1957 through 1959, except that for any such farm for which a new-producer share was established for the 1958 or 1959 crop, the farm base shall be the larger of the 1957-59 average accredited acreage, or the 1959 accredited acreage for the farm but not in excess of the 1959-crop proportionate share originally established for such farm.

(2) *Initial proportionate shares.* For each proportionate share district, the

total of individual farm bases for old-producer farms, as established pursuant to paragraph (d) of this section, is less than the district allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 361 acres. Accordingly, initial proportionate shares shall be established from the farm bases in each proportionate share district as follows: For farms for which respective requested acreage are equal to or less than their farm bases, the initial shares shall coincide with requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the district allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph. The proration factor for each district shall be as follows: Northern Ohio District—1.00; and Buckeye District—1.00.

(3) *Adjustments in initial shares.* Within the acreage available from the set-aside for adjustments, and from acreage of initial shares in excess of requested acreages in each proportionate share district, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the district by taking into consideration availability and suitability of land, area of available fields, crop rotation, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator.

(e) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers in each proportionate share district, proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that 10.0 acres are the minimum acreage which is economically feasible to plant as a new-producer farm share. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms, the State Committee, by taking into consideration availability and suitability of land, adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm, as provided in § 850.122(j), and shall establish new producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals, and any other acreage remaining unused in each proportionate share area, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the

provisions of § 850.122 applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage on farms in any county shall be reported to the ASC State Committee. Acreages released and so reported, together with available acreages from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122 (b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a Form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Ohio State Committee for determining farm proportionate shares in Ohio for the 1960 crop of sugar beets.

Ohio is again divided into the same two areas. Informal relationships are maintained with grower and processor representatives. In establishing proportionate shares for old producers, the factors of "past production" and "ability to produce" sugar beets are measured by three-year average accredited acreages for the crop years 1957-59, except that a more favorable formula is applied to such farms which were new-producer farms in 1958-59.

Farm shares for new producers are established as provided in § 850.122. Ten-acre shares are determined to be minimum economic units for new-producer farms.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic

beet sugar area to meet its quota and provide a normal carryover inventory.

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Texas Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), the Agricultural Stabilization and Conservation Texas State Committee has issued the bases and procedures for establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 1,905 acres and the supplemental allocation of 29 acres established for Texas, or from any unused acreage redistributed to Texas. Copies of these bases and procedures are available for public inspection at the office of such committee at the U.S.D.A. Building, College Station, Texas, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Texas. These bases and procedures incorporate the following:

§ 850.132 Texas.

(a) *Proportionate share areas.* In the establishment of individual farm proportionate shares, the State shall be deemed to be one allotment area.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from the State acreage allocation as follows: 19 acres for new producers, 19 acres for small producers, 19 acres for appeals, and 50 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date, for such filing as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed as provided in § 850.122, a fully-completed Form SU-100 shall be filed by March 29, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed Form SU-100 by such dates because of absence, illness, or other reasons beyond his control.

(d) *Establishment of individual proportionate shares for old-producer farms.* (1) *Farm bases.* For each old-producer farm, a farm base shall be determined by dividing by three the total accredited acreage of sugar beets for the farm during the crop years 1957 through 1959, except that for any such farm for which a new-producer share was established for the 1958 or 1959 crop, the farm base shall be the larger of the 1957-59 average accredited acreage or the 1959 accredited acreage for the farm but not in excess of the 1959-crop proportionate share originally established for such farm.

(2) *Initial proportionate shares.* The total of individual farm bases for old-producer farms in the State, as established pursuant to this paragraph, is less than the area allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 29 acres. Accordingly, initial proportionate shares shall be established from farm bases as follows: For farms for which respective requested acreages are equal to or less than their farm bases, the initial shares shall coincide with the requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the area allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph. The proration factor for the area shall be 1.0103.

(3) *Adjustments in initial shares.* Within the acreage available from the set-asides for adjustments and from acreage of initial shares in excess of requested acreages, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, availability of irrigation water, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator. The 19 acres set aside for small producers shall be used to increase the proportionate shares of all farms for which the relatively smallest shares would otherwise be established and for which additional acreages are requested.

(e) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers, proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that a 3.0-acre share is the minimum acreage which is economically feasible to plant as a new-producer farm share. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms,

the State Committee, by taking into consideration availability and suitability of land, availability of irrigation water, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm as provided in § 850.122(j), and shall establish new-producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122, applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* An acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage, together with acreage from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122(b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals, or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a Form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Texas State Committee for determining farm proportionate shares in Texas for the 1960 crop of sugar beets.

Advisory committees, including grower and processor representatives, are utilized. In establishing proportionate shares for old-producer farms, the factors of "past production" and "ability to produce" sugar beets are measured by three-year average accredited acreages for the crop years 1957-59, except that a more favorable formula is applied to such farms which were new-producer farms in 1958-59.

Farm shares for new producers are established as provided in § 850.122. Three-acre shares are determined to be minimum economic units for new-producer farms.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Iowa Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), the Agricultural Stabilization and Conservation Iowa State Committee has issued the bases and procedures for establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 1,430 acres and the supplemental allocation of 22 acres established for Iowa, or from any unused acreage redistributed to Iowa. Copies of these bases and procedures are available for public inspection at the office of such Committee at the Iowa Building, 505 Sixth Avenue, Des Moines, Iowa, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Iowa. These bases and procedures incorporate the following:

§ 850.133 Iowa.

(a) *Proportionate share areas.* In the establishment of individual farm proportionate shares, the State shall be deemed to be one allotment area.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from the State acreage allocation as follows: 165.0 acres for new producers, 31.6 acres for small producers, 15.2 acres for appeals, and 14.0 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before

the closing date for such filing, as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed, as provided in § 850.122, a fully completed Form SU-100 shall be filed by April 26, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed Form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(d) *Establishment of individual proportionate shares for old-producer farms.* (1) *Farm bases.* For each old-producer farm, a farm base shall be determined by dividing by three the total accredited acreage of sugar beets for the farm during the crop years 1957 through 1959, except that for any such farm for which a new-producer share was established for the 1958 or 1959 crop, the farm base shall be the larger of the 1957-59 average accredited acreage, or the 1959 accredited acreage for the farm but not in excess of the 1959-crop proportionate share originally established for such farm.

(2) *Initial proportionate shares.* The total of individual farm bases for old-producer farms in the State, as established pursuant to this paragraph, is less than the area allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 22 acres. Accordingly, initial proportionate shares shall be established from farm bases as follows: For farms for which respective requested acreages are equal to or less than their farm bases, the initial shares shall coincide with requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the area allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph. The proration factor for the area shall be 1.115561.

(3) *Adjustments in initial shares.* Within the acreage available from the set-aside for adjustments, and from acreage of initial shares in excess of requested acreages, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, crop rotation, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator. The 31.6 acres set aside for small producers shall be used to increase the proportionate shares of all farms for which the relatively smallest shares would otherwise be established and for which additional acreages are requested.

(e) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers proportionate shares shall be established in an equitable manner

for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that a 15.0 acre share is the minimum acreage which is economically feasible to plant as a new-producer farm share. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms, the State Committee, by taking into consideration availability and suitability of land, adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm as provided in § 850.122 (j), and shall establish new producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122 applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage shall be reported to the ASC State Committee. Acreages released and so reported together with available acreages from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122 (b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals, or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a Form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be re-determined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agri-

cultural Stabilization and Conservation Iowa State Committee for determining farm proportionate shares in Iowa for the 1960 crop of sugar beets.

In establishing proportionate shares for old producers, the factors of "past production" and "ability to produce" sugar beets are measured by three-year average accredited acreages for the crop years 1957-59, except that a more favorable formula is applied to such farms which were new-producer farms in 1958-59.

Farm shares for new producers are established as provided in § 850.122. Fifteen-acre shares are determined to be minimum economic units for new-producer farms.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

South Dakota Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), the Agricultural Stabilization and Conservation South Dakota State Committee has issued the bases and procedures for establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 6,343 acres and the supplemental allocation of 97 acres established for South Dakota, or from any unused acreage redistributed to South Dakota. Copies of these bases and procedures are available for public inspection at the office of such committee at 239 Wisconsin Street SW., Huron, South Dakota, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of South Dakota. These bases and procedures incorporate the following:

§ 850.134 South Dakota.

(a) *Proportionate share areas.* In the establishment of individual farm

proportionate shares, the State shall be deemed to be one allotment area.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from the State acreage allocation as follows: 190 acres for new producers, 63 acres for appeals, and 0 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date for such filing, as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed, as provided in § 850.122, a fully-completed Form SU-100 shall be filed by April 13, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(d) *Establishment of individual proportionate shares for old-producer farms.*—(1) *Farm bases.* For each old-producer farm, a farm base shall be determined by multiplying by .3333 the total accredited acreage of sugar beets for the farm during the crop years 1957 through 1959, except that for any such farm for which a new-producer share was established for the 1958 or 1959 crop, the farm base shall be the larger of the 1957-59 average accredited acreage, or the 1959 accredited acreage for the farm but not in excess of the 1959-crop proportionate share originally established for such farm.

(2) *Initial proportionate shares.* The total of individual farm bases for old-producer farms in the State, as established pursuant to this paragraph, is less than the area allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 97 acres. Accordingly, initial proportionate shares shall be established from farm bases as follows: For farms for which respective requested acreages are equal to or less than their farm bases, the initial shares shall coincide with requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the area allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph. The proration factor for the area shall be 1.210.

(3) *Adjustments in initial shares.* From acreage of initial shares in excess of requested acreages, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, crop rotation, availability of irrigation water, adequacy of drainage, availability of produc-

tion and marketing facilities, and the production experience of the operator. Any acreage released prior to April 1, 1960, shall be used to increase the proportionate shares of all farms in the area for which the relatively smallest shares would otherwise be established and for which additional acreages are requested, by taking into consideration the factors enumerated above so as to attain insofar as possible a common acreage level not to exceed 15 acres of sugar beets which is the acreage determined by the State Committee as the minimum economically feasible to plant in the area.

(e) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that a 15.0-acre share is the minimum acreage which is economically feasible to plant as a new-producer farm share. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms, the State Committee, by taking into consideration availability and suitability of land, availability of irrigation water, adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm, as provided in § 850.122(j), and shall establish new producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122 applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage on farms shall be reported to the ASC State Committee. Acreages released and so reported, together with available acreages from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122(b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate

share which is established, the person filing the request for such share shall be notified on a Form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation South Dakota State Committee for determining farm proportionate shares in South Dakota for the 1960 crop of sugar beets.

Advisory committees, including grower and processor representatives, are utilized. In establishing proportionate shares for old producers, the factors of "past production" and "ability to produce" sugar beets are measured by three-year average accredited acreages for the crop years 1957-59, except that a more favorable formula is applied to such farms which were new-producers farms in 1958-59.

Farm shares for new producers are established as provided in § 850.122. Fifteen-acre shares are determined to be minimum economic units for new-producer farms.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

[Sugar Determination 850.122, as Amended,
Supp. 13]

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Utah Proportionate Share Areas and Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122
(24 F.R. 10611; 25 F.R. 3574, 4427, 7357,

8067), the Agricultural Stabilization and Conservation Utah State Committee has issued the bases and procedures for dividing the State into proportionate share areas and establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 36,206 acres and the supplemental allocation of 552 acres established for Utah, or from any unused acreage redistributed to Utah. Copies of these bases and procedures are available for public inspection at the office of such committee at 222 SW. Temple Street, Salt Lake City, Utah, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Utah. These bases and procedures incorporate the following:

§ 850.135 Utah.

(a) *Proportionate Share Areas.* Utah shall be divided into six proportionate share areas as served by beet sugar companies. These areas shall be designated as follows: Garland, West Jordan-Gunnison, Cache, Ogden, Layton and Holly. Acreage allotments for these areas shall be computed on the basis of the average accredited acreage for the crop years 1957 through 1959 for each area, as a measure of "past production" and "ability to produce" sugar beets, with pro rata adjustments to the State allocation of 36,206 acres. This results in the following area acreage allocations: Garland Area—8,588 acres; West Jordan-Gunnison Area—16,311 acres; Cache Area—4,488 acres; Ogden Area—2,612 acres; Layton Area—3,321 acres; and Holly Area—886 acres.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from area allotments as follows: *For new producers:* Garland Area—86 acres, West Jordan-Gunnison Area—413.8 acres, Cache Area—114.0 acres, Ogden Area—87.5 acres, Layton Area—59.0 acres, and Holly Area—16.7 acres; *For small producers:* Garland Area—86 acres, West Jordan-Gunnison Area—0 acres, Cache Area—0 acres, Ogden Area—0 acres, Layton Area—7 acres, and Holly Area—1.3 acres; *For appeals:* Garland Area—86 acres, West Jordan-Gunnison Area—0 acres, Cache Area—45 acres, Ogden Area—26 acres, Layton Area—33 acres, and Holly Area—9 acres; *For making adjustments in initial shares:* Garland Area—0 acres, West Jordan-Gunnison Area—0 acres, Cache Area—45 acres, Ogden Area—130 acres, Layton Area—160 acres, and Holly Area—0 acres.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date, for such filing as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed as provided in § 850.122, a fully completed Form SU-100 shall be filed by March 31, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed Form SU-100 by such dates

because of absence, illness or other reasons beyond his control, and provided further, that requests may be accepted generally by the State Committee after such date if acreage is available within the area allotment.

(d) *Establishment of individual proportionate shares for old-producer farms—(1) Farm bases.* In each proportionate share area, other than the West Jordan-Gunnison Area, for each old-producer farm, a farm base shall be determined by dividing by three the total accredited acreage of sugar beets for the farm during the crop years 1957 through 1959, except that for any such farm for which a new-producer share was established for the 1958 or 1959 crop, the farm base shall be the larger of the 1957-59 average accredited acreage or the 1959 accredited acreage for the farm but not in excess of the 1959-crop proportionate share originally established for the farm. In the West Jordan-Gunnison Area, inasmuch as the total acreages requested by old producers by the closing date of January 29, 1960, are significantly less than the 16,311 acres allotted for the area, proportionate shares shall be established so as to coincide with the requested acreages.

(2) *Initial proportionate shares.* For each proportionate share area, the total of individual farm bases for old-producer farms, as established pursuant to paragraph (d) of this section, is less than the area allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 552 acres. Accordingly, initial proportionate shares shall be established from the farm bases in each proportionate share area other than the West Jordan-Gunnison Area, as follows: For farms for which respective requested acreages are equal to or less than their farm bases, the initial shares shall coincide with the requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the area allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph. The proration factor for each area other than the West Jordan-Gunnison area shall be as follows: Garland Area—1.10; Cache Area—1.25; Ogden Area—1.10; Layton Area—1.20; and Holly Area—1.31.

(3) *Adjustments in initial shares.* Within the acreage available from any set-aside for adjustments, and from acreage of initial shares in excess of requested acreages in each proportionate share area, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, crop rotation, availability of irrigation water, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator. Any acreages set aside for small producers in an area shall be used to increase the pro-

portionate shares of all farms in such area for which the relatively smallest shares would otherwise be established and for which additional acreages are requested, by taking into consideration the factors enumerated above so as to attain insofar as possible a common acreage level not to exceed 5 acres of sugar beets which is the acreage determined by the State Committee as the minimum economically feasible to plant in each area.

(e) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers in each proportionate share area, proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that a 5.0 acre share is the minimum acreage which is economically feasible to plant as a new-producer farm share. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms the State Committee, by taking into consideration availability and suitability of land, availability of irrigation water (where irrigation is used), adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm as provided in § 850.122(j) and shall establish new-producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused in each proportionate share area, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122, applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage on farms in any county shall be reported to the ASC State Committee. Acreages released and so reported, together with available acreages from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122(b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals, or the reconstitution of the farm, the farm operator shall be notified re-

garding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a Form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Utah State Committee for determining farm proportionate shares in Utah for the 1960 crop of sugar beets.

Utah is divided into six areas, as has been done for the preceding five crops. Informal relationships are maintained with grower and processor representatives. In establishing proportionate shares for old-producer farms in each area other than the West Jordan-Gunnison Area, the factors of "past production" and "ability to produce" sugar beets are measured by three-year average accredited acreages for the crop years 1957-59, except that a more favorable formula is applied to such farms which were new-producer farms in 1958-59. In the West Jordan-Gunnison area, proportionate shares were established so as to coincide with requested acreages.

Farm shares for new producers are established as provided in § 850.122. Five-acre shares are determined to be minimum economic units for new-producer farms.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

[Sugar Determination 850.122, as Amended, Supp. 14]

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Wyoming Proportionate Share Areas and Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), the Agricultural Stabilization and Conservation Wyoming State Committee has issued the bases and procedures for dividing the State into proportionate share areas and establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 41,097 acres and the supplemental allocation of 626 acres established for Wyoming, or from any unused acreage redistributed to Wyoming. Copies of these bases and procedures are available for public inspection at the office of such Committee at 345 East Second Street, Casper, Wyoming, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Wyoming. These bases and procedures incorporate the following:

§ 850.136 Wyoming.

(a) *Proportionate share areas.* Wyoming shall be divided into two proportionate share areas as served by beet sugar companies. These areas shall be designated as the Great Western Area and Holly Area, respectively. Acreage allotments of 11,451 and 29,646 acres, respectively, are established for these areas by prorating the State allocation of 41,097 acres to the areas, using as the base for each area the larger of the 1959 area allocation or the average accredited acres for the years 1955 through 1958 factored to the 1959 State allocation of 38,552 acres.

(b) *Set-aside of acreage.* Set-asides of acreage shall be made from area allotments as follows: Great Western Area—57 acres for new producers, 172 acres for small producers, 156 acres for appeals, and 333 acres for adjustments in initial shares, and Holly Area—148 acres for new producers, 445 acres for small producers, 278 acres for appeals, and 940 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date for such filing, as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed, as provided in § 850.122, a fully-completed form SU-100 shall be filed by March 15, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(d) *Establishment of individual proportionate shares for old-producer farms*—(1) *Farm bases*. For each old-producer farm, a farm base shall be determined by dividing by three the total accredited acreage of sugar beets for the farm during the crop years 1957 through 1959, except that for any such farm for which a new-producer share was established for the 1958 or 1959 crop, the farm base shall be the larger of the 1957-59 average accredited acreage, or the 1959 accredited acreage for the farm but not in excess of the 1959-crop proportionate share originally established for the farm.

(2) *Initial proportionate shares*. For the Holly Area, the total of individual farm bases for old-producer farms, as established pursuant to this paragraph, is less than the acre allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 626 acres. Accordingly, initial proportionate shares shall be established from the farm bases in the Holly Area as follows: For farms for which respective requested acreages are equal to or less than their farm bases, the initial shares shall coincide with requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the area allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph. The proration factor for the Holly Area shall be 1.0259. For the Great Western Area, the total of farm bases for old-producer farms as established pursuant to this paragraph exceeds the area allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 626 acres. Accordingly, initial proportionate shares shall be established from the farm bases in the Great Western Area by prorating to the farms in accordance with their respective bases, but not in excess of their requests, the area allotment less such set-aside. The proration factor for the Great Western Area shall be 0.9827.

(3) *Adjustments in initial shares*. Within the acreage available from the set-aside for adjustments, and from acreage of initial shares in excess of requested acreages in each proportionate share area, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, crop rotation, availability of irrigation water, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator. The acreages set aside for small producers in each area and any acreage released prior to March 20, 1960, shall be used to increase the proportionate shares of all farms in such area for which the rela-

tively smallest shares would otherwise be established and for which additional acreages are requested, by taking into consideration the factors enumerated above so as to attain insofar as possible common acreage levels not to exceed 8 acres of sugar beets in the Great Western Area and 10 acres of sugar beets in the Holly Area which are the acreages determined by the State Committee as the minimum economically feasible to plant in each area.

(e) *Establishment of individual proportionate shares for new-producer farms*. Within the acreage set aside for new producers in each proportionate share area, proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that a 10.0 acre share is the minimum acreage which is economically feasible to plant as a new-producer farm share in the Holly Area and 8.0 acres is such minimum acreage in the Great Western Area. The acreage available for establishing new-producer shares in each area shall be allotted in minimum economic units to counties within the area on the basis of total farm bases of old-producer farms, as established pursuant to paragraph (d) (1) of this section. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms, the State Committee, by taking into consideration availability and suitability of land, availability of irrigation water, adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm as provided in § 850.122(j), and shall establish new-producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals*. Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused in each proportionate share area, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122, applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage*. Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage on farms in any county shall be reported to the ASC State Committee. Acreages released and so reported after March 20, 1960, together with available acreages from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122(b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators*. The farm operator shall be notified concerning the proportionate share established for his farm on form SU-103, Notice of Farm Proportionate Share—

1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share*. The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail*. The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Wyoming State Committee for determining farm proportionate shares in Wyoming for the 1960 crop of sugar beets.

Wyoming is again divided into two areas. Informal relationships are maintained with grower and processor representatives. In establishing proportionate shares for old-producer farms, the factors of "past production" and "ability to produce" sugar beets are measured by three-year average accredited acreages for the crop years 1957-59, except that a more favorable formula is applied to such farms which were new-producer farms in 1958-59.

Farm shares for new producers are established as provided in § 850.122. Ten-acre shares in the Holly Area and eight-acre shares in the Great Western Area, are determined to be minimum economic units for new-producer farms.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals, are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

[Sugar Determination 850.122, as Amended, Supp. 16]

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

North Dakota Proportionate Share Areas and Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), the Agricultural Stabilization and Conservation North Dakota State Committee has issued the bases and procedures for dividing the State into proportionate share areas and establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 41,242 acres and the supplemental allocation of 629 acres established for North Dakota, or from any unused acreage redistributed to North Dakota. Copies of these bases and procedures are available for public inspection at the office of such Committee at 304 de Lendrecie Building, Fargo, North Dakota, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of North Dakota. These bases and procedures incorporate the following:

§ 850.138 North Dakota.

(a) *Proportionate share areas.* North Dakota shall be divided into two proportionate share areas comprising the separate sugar beet producing regions of the State, one of which is served by the American Crystal Sugar Company and the other by the Holly Sugar Corporation. These areas shall be designated the "Eastern Area" and the "Western Area", respectively. Acreage allotments of 36,599 and 4,643 acres, respectively, are established for these areas by applying to the State allocation the percentages that the average accredited acreages for such areas for the crop years 1957-59 are of the average accredited acreage for the State for the same period.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from area allotments as follows: Eastern Area—200 acres for new producers, 532 acres for small producers, 366 acres for appeals and 98 acres for adjustments in initial shares; Western Area—30 acres for new producers, 63 acres for small producers, 46 acres for appeals and 0 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date for such filing, as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed, a fully-completed Form SU-100 shall be filed by March 29, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State committee determines that in any such case the farm operator was prevented from filing a completed Form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(d) *Establishment of individual proportionate shares for old-producer farms—(1) Farm bases—(i) Western area.* For each old-producer farm, a farm base shall be determined by dividing by three the total accredited acreage of sugar beets for the farm during the crop years 1957 through 1959, except that for any such farm for which a new-producer share was established for the 1958 or 1959 crop, the farm base shall be the larger of the 1957-59 average accredited acreage for the farm, or the 1959-crop accredited acreage for the farm but not in excess of the 1959-crop proportionate share originally established for the farm.

(ii) *Eastern area.* If the 1960 operator is a tenant having a personal accredited acreage record within such area for the crop years 1957 through 1959, the base shall be the larger of the result of dividing by three his total personal accredited acreage record for the years 1957 through 1959 or the result of dividing by three the 1957 through 1959 accredited acreage record of the farm he will operate in 1960, except that the 1957 through 1959 accredited acreage record for the farm shall be limited to the landowner's share of the crops if a former tenant on such farm is given credit for personal history acquired on such farm during the base period for the purpose of computing a proportionate share for another farm he will be operating in 1960. However, notwithstanding the provisions of the preceding sentence, if the 1960 operator is a tenant who was the operator of a farm at the time a new-producer share was established for it in 1958 or 1959, the 1960 farm base shall be the largest of the acreage resulting from dividing by three the total personal accredited acreage of such tenant for the years 1957-59; the 1959-crop accredited acreage of the farm operated by him in 1959 but not to exceed the 1959-crop proportionate share originally established for such farm; or the land-owner's share of the sugar beet acreage grown during the base period on the farm which such tenant will operate in 1960 divided by three. If the 1960 operator is the owner-operator of a farm for which a new-producer share was established while operated by such owner-operator in 1958 or 1959, the 1960 farm base shall be the larger of the acreage resulting from dividing by three the total accredited acreage record of the farm for the years 1958 and 1959 or the 1959-crop accredited acreage of the farm but not to exceed the 1959-crop proportionate share originally established for the farm. If the operator is a tenant without a personal accredited acreage record in the crop years 1957 through 1959, or is the owner of the farm, the 1960 base shall be determined by dividing by three that portion of the total accredited acreage record of such farm for the crop years 1957 through 1959 which represents the farm owner's share of such acreage, except that if a former personal history tenant on such farm during the crop years 1957 through 1959 does not claim any of the farm history as personal history, the owner or tenant without personal history shall be

credited with 100 percent of the farm history. The landowner's share of sugar beet acreage grown on cash-rented land shall be deemed to be zero.

(2) *Initial proportionate shares.* For each proportionate share area, the total of individual farm bases for old-producer farms, as established pursuant to this paragraph is less than the area allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 629 acres. Accordingly, initial proportionate shares shall be established from the farm bases in each proportionate share area as follows: For farms for which respective requested acreages are equal to or less than their farm bases, the initial shares shall coincide with requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the area allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph. The proration factor for each area shall be as follows: Eastern Area—1.0380 and Western Area—1.0269.

(3) *Adjustments in initial shares.* Within the acreage available from the set-aside for adjustments, and from acreage of initial shares in excess of requested acreages in each proportionate share area, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, availability of irrigation water (where irrigation is used), adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator. The acreages set aside for small producers in each area shall be used to increase the proportionate shares of all farms in such area for which the relatively smallest shares would otherwise be established and for which additional acreages are requested, by taking into consideration the factors enumerated above so as to attain, insofar as possible, a common acreage level not to exceed 40 acres of sugar beets in the Eastern Area and 15 acres of sugar beets in the Western Area which are the acreages determined by the State Committee as the minimum economically feasible to plant in each area.

(e) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers in each proportionate share area, proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined that a 40.0-acre share is the minimum acreage which is economically feasible to plant as a new-producer farm share in the Eastern Area and 15.0 acres in the Western Area. In determining whether a farm for which a request is filed for a new-producer share may

qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms, the State Committee, by taking into consideration availability and suitability of land, availability of irrigation water (where irrigation is used), adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm as provided in § 850.122(j), and shall establish new-producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused in each proportionate share area, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122 applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage on farms in any county shall be reported to the ASC State Committee. Acreages released and so reported, together with available acreages from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122(b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a Form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation North Dakota State Committee for determining farm proportionate shares in North Dakota.

North Dakota is divided into two areas, as has been done for the preceding five crops. Informal relationships are maintained with grower and processor

representatives. In establishing proportionate shares for old producers, the factors of "past production" and "ability to produce" sugar beets are measured by three-year average accredited acreages for the crop years 1957-59, except that a more favorable formula is applied to such farms which were new-producer farms in 1958-59.

Farm shares for new producers are established as provided in § 850.122. Forty-acre shares are determined to be minimum economic units for new-producer farms in the Eastern Area and fifteen acres in the Western Area.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

[Sugar Determination 850.122, as Amended, Supp. 17]

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Kansas Farm Proportionate Shares for 1960 Crop

Pursuant to the provisions of § 850.122 (24 F.R. 10611; 25 F.R. 3574, 4427, 7357, 8067), The Agricultural Stabilization and Conservation Kansas State Committee has issued the bases and procedures for establishing individual farm proportionate shares for the 1960 sugar beet crop from the allocation of 8,931 acres and the supplemental allocation of 136 acres established for Kansas, or from any unused acreage redistributed to Kansas. Copies of these bases and procedures are available for public inspection at the office of such Committee at the Wareham Building, 417 Humboldt Street, Manhattan, Kansas, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Kansas. These bases and procedures incorporate the following:

§ 850.139 Kansas.

(a) *Proportionate share areas.* In the establishment of individual proportionate shares, the State shall be deemed to be one allotment area.

(b) *Set-asides of acreage.* Set-asides of acreage shall be made from the State acreage allocation as follows: 90 acres for new producers, 90 acres for small producers, 90 acres for appeals, and 608.5 acres for adjustments in initial shares.

(c) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU-100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date for such filing, as provided in § 850.122. If a preliminary request for a tentative farm proportionate share is filed as provided in § 850.122, a fully-completed Form SU-100 shall be filed by March 29, 1960. However, requests for proportionate shares may be accepted after such dates and shares may be established if the State Committee determines that in any such case the farm operator was prevented from filing a completed Form SU-100 by such dates because of absence, illness or other reasons beyond his control.

(d) *Establishment of individual proportionate shares for old-producer farms—*(1) *Farm bases.* For each old-producer farm operated by a tenant in 1960, a farm base shall be determined by dividing by four the combined credits of land history and the personal history of the operator (within the State) for the crop years 1956 through 1959. For each of the 1956 and 1957 crop years, the land history to be credited will be that acreage equal to the landowner's percentage share in the applicable crop of sugar beets times the total accredited acreage for each such year, and for the 1958 and 1959-crop years, the acreage to be credited shall be 50 percent of the accredited sugar beet acreage on the farm. However, 100 percent of the land history may be credited for any year or years 1956 through 1959 if the tenant on the farm for such year or years does not file a request for a 1960 proportionate share on any other land in the State. For each of the 1956 and 1957 crop years, the personal history to be credited shall equal the 1960-operator's actual sugar beet accredited acreage multiplied by his percentage share in each such crop, and for the 1958 and 1959-crop years, the acreage to be credited shall equal 50 percent of the operator's actual acreage. However, if the 1960-crop operator is a tenant who produced sugar beets in any of the crop years 1956 through 1959 on land other than that which he will operate in 1960, such 1960 operator shall be credited with 100 percent of his personal accredited acreage on such land during the applicable years for which land history credit is unclaimed by the 1960 operators of such land. For any farm which is operated for the 1960-crop year by the owner, or by a tenant who has no personal accredited acreage record for the crop years 1956 through 1959, the 1960 farm base shall be determined by dividing by four the sum of that portion of the total accredited acreage record of the farm for the crop years 1956 and 1957 which represents the landowner's share of such acreage and 50 percent of the total acreage record of the farm for the 1958 and 1959 crop years. However, such

owner or tenant without personal history shall be credited with 100 percent of the farm history during the applicable years 1956 through 1959 for which personal history is unclaimed by tenants who operated such land. Notwithstanding the foregoing, for any farm for which a new-producer share was established in 1957, 1958 or 1959, the 1960 base shall be not less than the larger of the acreage resulting from dividing by four the sum of the accredited acreage for the farm for the years 1957 through 1959, or the 1959 accredited acreage for the farm but not to exceed the 1959-crop proportionate share originally established for the farm. If a new-producer share was established in 1957, 1958 or 1959 for the operator as a tenant on a farm other than the one he will operate in 1960, the 1960 farm base shall equal the largest of the following: The acreage resulting from dividing by four the sum of his personal accredited acreage for the years 1957, 1958 and 1959; the 1959 accredited acreage of the farm he operated in 1959 but not to exceed the 1959-crop proportionate share originally established for such farm; or the acreage resulting from dividing by four the land-owners share of the acreage on the 1960 farm for the year 1957 plus 50 percent of the 1958 and 1959-crop acreages on such farm.

(2) *Initial proportionate shares.* The total of individual farm bases for old-producer farms in the State as established pursuant to this paragraph is more than the area allotment minus the set-asides of acreage established under paragraph (b) of this section and exclusive of the supplemental State allocation of 136 acres. Accordingly, initial proportionate shares shall be established from the farm bases by prorating to such farms, in accordance with their respective bases, the area allotment less the prescribed set-asides. The proration factor for the area is 0.99.

(3) *Adjustments in initial shares.* Within the acreage available from the set-aside for adjustments, and from acreage of initial shares in excess of requested acreages, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration availability and suitability of land, area of available fields, crop rotation, availability of irrigation water, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator. All of the acreage set aside for small producers shall be used to increase the proportionate shares of all farms in the area for which the relatively smallest shares would otherwise be established and for which additional acreages are requested, by taking into consideration the factors enumerated above so as to attain insofar as possible a common acreage level not to exceed 30 acres of sugar beets which is the acreage determined by the State Committee as the minimum economically feasible to plant in each area.

(e) *Establishment of individual proportionate shares for new-producer*

farms. Within the acreage set aside for new producers, proportionate shares shall be established in an equitable manner for farms to be operated during the 1960-crop year by new producers (as defined in § 850.122). The State Committee has determined a 30.0-acre share to be the minimum acreage which is economically feasible to plant as a new-producer farm share. In determining whether a farm for which a request is filed for a new-producer share may qualify for such a share, and to assist in establishing new-producer shares which are fair and equitable as to relative size among qualified farms, the State Committee, by taking into consideration availability and suitability of land, availability of irrigation water, adequacy of drainage, the production experience of the operator, and the availability of production and marketing facilities, shall rate each farm as provided in § 850.122 (j) and shall establish new-producer farm proportionate shares as provided therein.

(f) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused in the proportionate share area, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.122, applicable to appeals.

(g) *Adjustments because of unused or unallotted acreage.* Any acreage made available during the 1960-crop season by underplanting or failure to plant proportionate share acreage, together with acreage from unused set-asides, from other sources of unused acreage, or from any acreage made available pursuant to § 850.122(b) (3) and (4), shall be distributed to farms in the State whereon additional acreage may be used.

(h) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU-103, Notice of Farm Proportionate Share—1960 Sugar Beet Crop, even if the acreage established is "none". In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals, or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU-103-A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a Form SU-103-B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(i) *Redetermination of proportionate share.* The proportionate share determined for any farm which is subdivided into, combined with, or becomes a part of another farm or farms shall be redetermined as provided in § 850.122.

(j) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.122.

Statement of bases and considerations. This supplement sets forth the bases and

procedures established by the Agricultural Stabilization and Conservation Kansas State Committee for determining farm proportionate shares in Kansas for the 1960 crop of sugar beets.

Kansas constitutes one proportionate share area. An advisory committee, including grower and processor representatives, is utilized. In establishing proportionate shares for old-producer farms, the factors of "past production" and "ability to produce" sugar beets are measured by applying a formula to the combined acreage records for the farm and the farm operator during the crop years 1956-59. However, a more favorable formula is applied in cases involving new-producer shares in 1957, 1958 or 1959. Farm shares for new producers are established as provided in § 850.122.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 958—IRISH POTATOES GROWN IN COLORADO

Limitation of Shipments; Area No. 1

Findings. (a) Marketing Order No. 58, as amended (7 CFR Part 958; 25 F.R. 7092), effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), provides methods for limiting the handling of potatoes grown in the areas defined therein through the issuance of regulations authorized in §§ 958.1 through 958.92, inclusive. Area No. 1 (Western Slope) Committee, established pursuant to § 958.50, has recommended regulations limiting the handling of 1960 crop potatoes. The committee recommendations, with information submitted therewith, and other available information, have been considered, and it is hereby found that the regulations hereinafter set forth will tend to effectuate the declared policy of the act.

(b) It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, en-

gage in public rule making procedure, and postpone the effective date of this section until 30 days after publication in the *FEDERAL REGISTER* (5 U.S.C. 1001-1011) in that (i) the time intervening between the date when information upon which this section is based became available, and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, (ii) more orderly marketing in the public interest than would otherwise prevail will be promoted by regulating shipments of potatoes in a manner set forth below on and after the effective date of this section, (iii) compliance with this section will not require any special preparation on the part of handlers which cannot be completed by the effective date, (iv) reasonable time is permitted under the circumstances for such preparation, and (v) information regarding the committee's recommendations has been made available to producers and handlers of potatoes in Area No. 1 in the production area.

§ 958.335 Limitation of shipments.

During the period from October 3, 1960, through June 30, 1961, no person shall handle any lot of potatoes grown in Area No. 1 unless such potatoes meet the quality and maturity requirements of paragraphs (a) and (b), of this section, or unless such potatoes are handled in accordance with the provisions of paragraphs (c) and (d), of this section.

(a) *Minimum grade and size requirements*—(1) *Round varieties*. U.S. No. 2, or better, grade, 2 inches minimum diameter.

(2) *Long varieties*. U.S. No. 2, or better, grade, 2 inches minimum diameter or 4 ounces minimum weight.

(b) *Minimum maturity (skinning) requirements*—All varieties. Not more than "slightly skinned."

(c) *Special purpose shipments*. (1) The quality and maturity requirements set forth in paragraphs (a) and (b) of this section and the inspection and assessment requirements of this part shall not be applicable to potatoes handled for livestock feed.

(2) Potatoes may be handled for chipping or shoestrings if such potatoes meet the grade and size requirements of paragraph (a) of this section, except for (i) scab and (ii) the maturity requirements of paragraph (b) of this section.

(3) Potatoes may be handled for export if such potatoes meet the requirements of U.S. No. 1, or better, grade, size B.

(4) The quality and maturity requirements of paragraphs (a) and (b) of this section shall not be applicable to the handling of potatoes for seed as defined in § 958.6 but any lot of potatoes handled for seed shall be subject to assessments.

(d) *Safeguards*. Each handler of potatoes which do not meet the quality and maturity requirements of paragraphs (a) and (b) of this section and which are handled pursuant to paragraph (c) of this section for any of the special purposes set forth therein shall, prior to handling, apply for and obtain a Certificate of Privilege from the committee,

which shall require, among other things, the handler to furnish such reports and documents as the committee may require showing that the potatoes so handled were utilized for the purpose specified in the Certificate of Privilege.

(e) *Inspection*. No handler shall handle any potatoes for which inspection is required unless an appropriate inspection certificate has been issued with respect thereto.

(f) *Definitions*. The terms "U.S. No. 1," "U.S. No. 2," "slightly skinned," "scab" and "size B" shall have the same meaning as when used in the United States Standards for Potatoes (§§ 51.1540 to 51.1556 of this title), including the tolerances set forth therein. Other terms used in this section shall have the same meaning as when used in Marketing Order No. 58, as amended.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: September 29, 1960 to become effective October 3, 1960.

Chapter III—Bureau of Old-Age and Survivors Insurance, Social Security Administration, Department of Health, Education, and Welfare

[Regs. 4, amended]

PART 404—FEDERAL OLD-AGE AND SURVIVORS INSURANCE (1950—)

Recoupment of Overpayment by Withholding Less Than Full Amount of Monthly Benefit; Administrative Action Regarding Recoupment by Partial Adjustment Not an Appealable Determination

Regulations No. 4, as amended, of the Social Security Administration (20 CFR 404.1 et seq.) are amended as follows:

1. Section 404.502 is revised to read as follows:

§ 404.502 Overpayments.

Upon determination that an overpayment has been made, adjustments shall be made against benefits and lump sums as follows:

(a) *Individual overpaid entitled to benefits and/or lump sums*. If the individual to whom an overpayment was made is, at the time of the discovery of such overpayment, entitled to benefits or to a lump sum, or at any time thereafter becomes so entitled, no benefit for any month and no lump sum shall be paid to such individual except as provided in paragraph (c) of this section until a total amount equal to the amount of the overpayment has been withheld. Such adjustments shall be made against

any benefits or lump sum to which such individual is or may become entitled regardless of whether payable on his earnings or the earnings of another individual.

(b) *Individual overpaid dies before adjustment*. If an individual to whom an overpayment was made dies before adjustment is completed under paragraph (a) of this section, no lump sum and no subsequent monthly benefit payable with respect to the earnings which were the basis of benefits of such deceased individual shall be paid until recovery of the overpayment has been effected, except as provided in paragraph (c) of this section.

(c) *Adjustment by withholding part of a monthly benefit*. Adjustment under paragraphs (a) and (b) of this section may be effected by withholding a part of the monthly benefit payable to an individual where it is determined that:

(1) Withholding the full amount each month would "defeat the purpose of title II," i.e., deprive the beneficiary of minimum subsistence income (see § 404.508); and

(2) Recoupment can be effected in an amount of not less than \$10 a month and at a rate which would not result in extending the period of adjustment beyond the earlier of the following:

(i) The expected last month of entitlement; or

(ii) 3 years after the initiation of the adjustment action (except that in cases where the individual was "without fault" (see §§ 404.507 and 404.510), the period of adjustment may be extended beyond 3 years, if necessary); and

(3) The overpayment was not caused by the individual's intentional false statement or representation, or willful concealment of, or deliberate failure to furnish, material information.

2. In § 404.905(b), subparagraph (4) is amended by adding at the end thereof the parenthetical phrase "(see § 404.906(e) for exception)." And so amended, § 404.905(b) (4) reads as follows:

§ 404.905 Initial determination; determinations affecting benefits, lump sums, establishment and continuance of periods of disability, and earnings records.

(b) *Modification of the amount of benefits or a lump sum*. The Bureau shall, under the circumstances hereafter stated, make findings setting forth the pertinent facts and conclusions, and an initial determination as to whether:

(4) There has been an overpayment or underpayment of benefits or a lump sum and, if so, the amount thereof (see § 404.504 and § 404.505), and the adjustment, under section 204(a) of the act (see §§ 404.502 and 404.503), to be made by increasing or decreasing the benefits or lump sum to which an individual is entitled (see § 404.906(e) for exception); or

3. Section 404.906 is amended by adding at the end thereof new paragraph (e), as follows:

§ 404.906 Administrative actions which are not initial determinations.

Administrative actions which shall not be considered initial determinations under any provision of the regulations in this Subpart J include, but are not limited to, the following:

(e) The withholding by the Bureau in any month, for the purpose of recouping an overpayment, of less than the full amount of the monthly benefit otherwise payable in that month (see § 404.502).

(Sections 204(a), 53 Stat. 1368, as amended, 205(a), 53 Stat. 1368, as amended, and 1102, 49 Stat. 647, as amended; 42 U.S.C. 404(a), 405(a), 1302; section 5 of Reorganization Plan No. 1 of 1953, 67 Stat. 18. Interprets or applies sections 204(a), 53 Stat. 1368, as amended, and 205(a), 53 Stat. 1368, as amended; 42 U.S.C. 404(a), 405(a))

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 121—FOOD ADDITIVES

Subpart C—Food Additives Permitted in Animal Feed or Animal Feed Supplements

ZOALENE IN CHICKEN FEED

The Commissioner of Food and Drugs, having evaluated the data submitted in a petition filed by the Dow Chemical Company, Midland, Michigan, and other relevant material, has concluded that the following amendment of the food additive regulation, § 121.207, should issue in conformance with section 409 of the Federal Food, Drug, and Cosmetic Act with respect to the food additive zoalene in chicken feed. Therefore, pursuant to the provisions of the act (sec. 409(c) (1), 72 Stat. 1786; 21 U.S.C. 348(c) (1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (23 F.R. 9500, 25 F.R. 5611), § 121.207(a) (25 F.R. 3837) is amended to read as follows:

§ 121.207 Zoalene (3,5-dinitro-o-toluidine) in chicken feed.

(a) It is intended for use in the prevention and control of cecal and intestinal coccidiosis in chickens caused by *Eimeria acervulina*, *Eimeria brunetti*, *Eimeria maxima*, *Eimeria necatrix* or *Eimeria tenella*.

Any person who will be adversely affected by the foregoing order may at any time prior to the thirtieth day from the date of its publication in the FEDERAL

REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington 25, D.C., written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof. All documents shall be filed in quintuplicate.

Effective date. This order shall be effective on the date of its publication in the FEDERAL REGISTER.

Dated: September 26, 1960.

PART 146—GENERAL REGULATIONS FOR THE CERTIFICATION OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

Animal Feed Containing Antibiotic Drugs

Under the authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended; sec. 701, 52 Stat. 1055, as amended; 21 U.S.C. 357, 371) and delegated to the Commissioner of Food and Drugs by the Secretary (23 F.R. 9500; 25 F.R. 5611), the general regulations for the certification of antibiotic and antibiotic-containing drugs (21 CFR 146.26) are amended as follows:

Section 146.26 *Animal feed containing penicillin* * * *, is amended in the following respects:

1. The introduction to paragraph (b) (25) is amended by changing the words "prevention or treatment of foot rot" to read "prevention of foot rot", and as amended reads as follows:

(b) * * *
(25) It is intended for use as an aid in the reduction of bacterial diarrhea in beef cattle or as an aid in the prevention or treatment of bacterial pneumonia and shipping fever (hemorrhagic septicemia) or as an aid in reduction of losses due to respiratory infection (infectious rhinotracheitis—shipping fever complex) or as an aid in the prevention of foot rot in cattle or as an aid in the prevention of anaplasmosis in cattle or as an aid in the prevention of liver abscesses in feed-lot beef cattle; its labeling bears adequate directions and warnings for such uses; and it contains the following quantities of chlortetracycline, by weight of feed, for the conditions indicated:

2. Paragraph (b) (25) (ii) is amended by deleting the words "or treatment".

As amended subparagraph (ii) reads as follows:

(b) * * *
(25) * * *

(ii) For the prevention of foot rot in cattle; 0.1 milligram per pound of body weight per day.

3. The introduction to paragraph (b) (34) is amended by changing the words "prevention or treatment of foot rot" to read "prevention of foot rot", and as amended reads as follows:

(b) * * *

(34) It is intended for use as an aid in the reduction of bacterial diarrhea in dairy cattle or as an aid in reduction of losses due to respiratory infection (infectious rhinotracheitis—shipping fever complex) or as an aid in the prevention of foot rot in cattle; its labeling bears adequate directions and warnings for such uses; and it contains the following quantities of chlortetracycline, by weight of feed, for the conditions indicated:

4. Paragraph (b) (34) (i) is amended by deleting the words, "or treatment". As amended subparagraph (i) reads as follows:

(b) * * *

(i) For the prevention of foot rot and as an aid in the reduction of bacterial diarrhea in dairy cattle: 0.1 milligram per pound of body weight per day.

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since the amendments have the consent of the affected industry and since it would be contrary to public interest to delay providing for the amendments incorporated in this order.

Effective date. This order shall become effective on the date of its publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

Rupe, Individually and as an Officer of Said Corporation, and Arthur N. Rupe, as a General Partner Trading as Specialty Record Sales Co., a Limited Partnership

These proceedings were heard by hearing examiners on complaints of the Commission charging manufacturers and distributors of phonograph records in various States with giving concealed "payola"—money or other material consideration—to disc jockeys of television and radio programs or others to induce broadcasting of their records.

Accepting consent agreements, the hearing examiners made their initial decisions and orders to cease and desist which became, on the dates above indicated, the decisions of the Commission.

The orders to cease and desist, combining the respondents in these six cases, are as follows:

It is ordered, That respondents, Am-Par Record Corp., a corporation, and its officers, Pamco Music, Inc., a corporation, and its officers, Samuel H. Clark, individually, and as an officer of said corporations, and Harry Levine, Edith Schaffer, and Simon B. Siegel, as officers of said corporations; Garmisa Distributing Company, Inc., a corporation, and Garmisa Inc. of Wis., a corporation, and their officers, and Leonard Garmisa, and Edward Yalowitz, individually and as officers of said corporations, and Myron J. and Blanche Kaslin, individually and as officers of said corporation; Nashboro Record Company, Inc., a corporation, and its officers, and Ernest L. Young, individually and as an officer of said corporation; Portem Distributing, Inc., a corporation, and its officers, and Gladys R. Pare, individually and as an officer of said corporation; and Specialty Records, Inc., a corporation, and its officers, and Arthur N. Rupe, individually and as an officer of said corporation, and Arthur N. Rupe, as a general partner trading as Specialty Record Sales Co., a limited partnership; and respondents' agents, representatives and employees, directly or through any corporate or other device, in connection with phonograph records which have been distributed in commerce, or which are used by radio or television stations in broadcasting programs in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Giving or offering to give, without requiring public disclosure, any sum of money, or other material consideration, to any person, directly or indirectly, to induce that person to select, or participate in the selection of, and broadcasting of, any such records in which respondents, or any of them, have a financial interest of any nature.

2. Giving or offering to give, without requiring public disclosure, any sum of money, or other material consideration, to any person, directly or indirectly, as an inducement to influence any employee of a radio or television broadcasting station, or any other person, in any manner, to select, or participate in the selection of, and the broadcasting of, any such records in which respondents, or any of them, have a financial interest of any nature.

There shall be "public disclosure" within the meaning of this order by any employee of a radio or television broadcasting station, or any other person, who selects or participates in the selection and broadcasting of a record, when he shall disclose, or cause to have disclosed, to the listening public at the time the record is played, that his selection and broadcasting of such record are in consideration for compensation of some nature, directly or indirectly, received by him or his employer.

The following additional order is included in Docket 7778, Am-Par Record Corp. et al.:

It is further ordered, That the complaint be, and hereby is, dismissed as to Harry Levine, Edith Schaffer, and Simon B. Siegel individually, but not as officers of the said corporate respondents.

By "Decision of the Commission", etc., in each case, reports of compliance were required as follows:

It is ordered, That respondents herein and Harry Levine, Edith Schaffer, and Simon B. Siegel, as officers (Docket 7778), shall, within sixty (60) days after service upon them of these orders, file with the Commission reports in writing setting forth in detail the manner and

Title 25—INDIANS

Chapter I—Bureau of Indian Affairs, Department of the Interior

SUBCHAPTER I—LEASING AND PERMITTING

PART 131—LEASING AND PERMITTING

Navajo and Colorado River Reservations

Pursuant to the authority vested in the Secretary of the Interior by the Revised Statutes, sections 161, 463, and 465 (5 U.S.C. 22; 25 U.S.C. 2, 9), two new sections are added to Part 131, Title 25 of the Code of Federal Regulations, to read as set forth below. The purpose of these regulations is to implement Public Law 86-505 (74 Stat. 199), which authorizes lands on the Navajo Reservation to be leased for certain periods up to 99 years; and Public Law 86-506 (74 Stat. 199), which authorizes the leasing on the Colorado River Reservation of those lands situated within the State of Arizona.

It is the policy of the Department of the Interior to publish amendments to the Code of Federal Regulations as notice of proposed rule making before adoption. However, these regulations consist only of a restatement of the authority contained in the statutes and are being promulgated to incorporate these authorities in the published regulations governing the leasing of Indian lands, thereby making the general leasing authorities contained in Part 131 applicable to leases granted pursuant to these statutes. Because these regulations do not contain any authority or procedural matter other than that contained in the text of the statutes, notice and public procedure thereon have been deemed impracticable and the regulations shall become effective at the beginning of the 15th calendar day following the date of publication in the FEDERAL REGISTER. These regulations are hereby adopted as set forth below.

§ 131.30 Navajo Reservation.

Notwithstanding the provisions of § 131.14(a) leases of land on the Navajo Reservation for public, religious, educational, recreational, residential or business purposes may be made for a term of not to exceed ninety-nine years.

§ 131.31 Colorado River Reservation.

(a) The Secretary may lease any unassigned lands located within Arizona on the Colorado River Reservation for such

uses and terms as are authorized by these regulations. Lands heretofore assigned on this reservation may be leased by the holders of the assignments in accordance with these regulations.

(b) Income received from leases of unassigned lands may be expended or advanced by the Secretary for the benefit of the Colorado River Indian Tribes and their members. Income received from leases of assigned lands may be expended or advanced for the benefit of the assignee.

Chapter I—Veterans Administration

PART 2—DELEGATIONS OF AUTHORITY

Chairman and Vice Chairman, Board of Veterans Appeals

Part 2, Chapter I of Title 38 of the Code of Federal Regulations is amended by adding a new § 266 as follows:

§ 2.66 Chairman and Vice Chairman, Board of Veterans Appeals delegated authority to authorize assumption of jurisdiction of adjudicative determination not involved in appeal before Board where determination has not become final; administrative action on adjudicative determination not involved in appeal before Board where determination has become final; and determinations as body of original jurisdiction on questions of entitlement to emergency officers' retirement pay under provisions of section 11, Public Law 85-857; and to approve central office investigations of matters before the Board.

This delegation of authority is identical of § 19.0a of this chapter.

PART 19—BOARD OF VETERANS APPEALS

Miscellaneous Amendments

1. Section 19.0 is revised to read as follows:

§ 19.0 General appellate jurisdiction.

All questions on claims involving benefits under the laws administered by the Veterans Administration are subject to review on appeal to the Administrator of Veteran Affairs, decisions in such cases to be made by the Board of Vet-

erans Appeals. Jurisdiction is vested by statute in the Board to make final decisions on all questions reviewed on appeal (38 U.S.C. 4004(a)). In its decisions, the Board is bound by the regulations of the Veterans Administration, instructions of the Administrator and precedent opinions of the chief law officer. The statutory jurisdiction vests responsibility in the Board to apply and exercise all the adjudicative criteria and authority in such controlling media properly for application by the department having original adjudicative responsibility for claims for benefits.

2. Section 19.0a is added as follows:

§ 19.0a Delegation of authority to Chairman and Vice Chairman, Board of Veterans Appeals.

In addition to the authority vested in the Chairman and Vice Chairman, Board of Veterans Appeals, by law, Veterans Administration regulations and manuals, authority is delegated to each as follows:

(a) To authorize assumption of jurisdiction of an adjudicative determination not involved in an appeal before the Board where the determination has not become final.

(b) To authorize administrative action on an adjudicative determination not involved in an appeal before the Board where the determination has become final.

(c) To authorize determinations as a body of original jurisdiction on questions of entitlement to emergency officers' retirement pay under the provisions of section 11, Public Law 85-857.

(d) To approve Central Office investigations of matters before the Board.

3. Sections 19.1, 19.2, and 19.3 are revised to read as follows:

§ 19.1 Subject matter of appeals.

More specifically, the Board's appellate jurisdiction covers questions of entitlement to compensation for service-connected disabilities; pensions for disability without regard to service connection; death compensation and pension; dependency and indemnity compensation; vocational rehabilitation, including need therefor; education and training allowance; subsistence allowance; educational assistance allowance and special training allowance (38 U.S.C. ch. 35); special allowance (38 U.S.C. 412); death gratuity (38 U.S.C. 423); insurance benefits, including maturity of contracts, waiver of premiums, and legal beneficiary; payment or reimbursement for unauthorized medical expenses; burial allowances; disability suffered as the result of examination, treatment or hospitalization or vocational training; emergency officers' retirement benefits; basic eligibility to loans and unemployment compensation; adjusted compensation; waiver or recovery of overpayments; forfeiture of rights; and all related mixed questions of fact and law, such as character and type of service, attorney fees, marital relations, dependency, validity of claims, apportionment, reduction and increase

in compensation or pension benefits, and similar questions.

§ 19.2 Time within which appeals must be filed.

(a) *Notice.* The claimant will be informed of the right of appeal and the time limit within which an appeal must be filed. This information will be included in each notification of a determination of entitlement or nonentitlement by an agency of original jurisdiction. Failure of a claimant to receive such written notice will not extend the time for filing appeal.

(b) *Time limit.*—(1) *General.* Applications for review on appeal shall be filed within 1 year from the date of mailing of notification of the result of the initial review or determination.

(2) *Contested claims.* Where one claim is allowed and one denied, or the allowance of one claim would result in payment of a lower rate to another claimant, application for review on appeal by the person adversely affected shall be filed within 60 days from the date of mailing of notification of the review or determination.

(c) *Acceptance of, postmark date.* Applications postmarked prior to the expiration of the applicable appeal period will be accepted as having been timely filed.

(d) *Appeals questioned as to timely filing.* If there is a question as to whether an appeal was in fact timely filed, or if a protest is received from a determination that an appeal was not timely filed, the agency of original jurisdiction will forward the case to the Board of Veterans Appeals, where jurisdiction will be finally determined.

§ 19.3 Right to a hearing.

A claimant who has filed an appeal to the Administrator shall be entitled upon request to a formal hearing before a section of the Board of Veterans Appeals or, at his discretion, before designated personnel acting as a hearing agency for the Board of Veterans Appeals in a district or regional office or center having adjudication activities. The claimant, or his authorized representative, or both, may be heard along with such witnesses as he may present. Appearance at a hearing shall be without expense to the Government.

4. Section 19.6 is revoked:

§ 19.6 Jurisdiction to correct errors.

[Revoked]

5. Section 19.7 is revised to read as follows:

§ 19.7 Administrative appeals; employees authorized to file appeals.

Pursuant to the authority contained in 38 U.S.C. 4005(c)(2), a chief director, service director of a department, the Chairman, Board on Waivers and Forfeitures, or the General Counsel is hereby authorized to file an administrative appeal within 1 year from the date of

decision, or within 1 year from the date of mailing of notice of such decision, whichever is the later date. Managers, the adjudication officers and officials at comparable level in field offices deciding any claims for benefits are authorized to file an appeal from any decision originating within their established jurisdiction. Such an appeal is authorized by a Manager within 6 months from the date of the decision or within 6 months from the date of mailing of notice of the decision, whichever is the later date, and by officials below the level of Manager within 60 days from such date.

6. Sections 19.8, 19.9 and 19.10 are added as follows:

§ 19.8 Merger of administrative appeals in veteran's appeal.

A claimant may elect to join in an administrative appeal. If, after being notified of such an appeal, he chooses to submit evidence or argument or to appear at a hearing, he will be deemed to have joined in the appeal. However, if the evidence or argument concern other issues, the appeal will not be merged. Where the claimant does not join the administrative appeal, normal appellate rights will be preserved.

§ 19.9 Appeal on same issue subsequent to decision on administrative appeal.

Members of the Board signatory to the decision on administrative appeal will disqualify themselves from acting on a subsequent appeal by the claimant on the same issue.

§ 19.10 Restriction as to change in payments pending determination of administrative appeals.

In the event of an administrative appeal, no change in payments based on that review or determination will be made until a decision is made by the Board of Veterans Appeals.

Chapter I—Interstate Commerce Commission

SUBCHAPTER B—CARRIERS BY MOTOR VEHICLE

[Ex Parte No. MC-37]

PART 170—COMMERCIAL ZONES AND TERMINAL AREAS

Ravenswood, W. Va., Commercial Zone

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D.C., on the 22d day of January A.D. 1960.

It appearing, that on November 26, 1946, the Commission, Division 5, made and entered its report, 46 M.C.C. 665, and order in this proceeding establishing a mileage-population formula for the definition of the limits of the zone adjacent to and commercially a part of every municipality in the United States, with certain exceptions which did not include Ravenswood, W. Va.;

It further appearing, that by petition filed April 18, 1958, Allegheny Freight Lines, Inc., seeks redefinition and extension of the Ravenswood, W. Va., commercial zone limits;

It further appearing, that an informal conference has been held at Ravenswood W. Va., on November 18, 1958, wherein petitioner, and other persons presented their views in support of or in opposition to the relief sought in said petition;

It further appearing, that a Notice of Proposed Rule Making affecting the Ravenswood, W. Va., commercial zone limits was published in the FEDERAL REGISTER on August 12, 1959. (24 F.R. 6504);

And it further appearing, that section 203(b)(8) of the Interstate Commerce Act (49 U.S.C. 303(b)(8)) and the transportation of passengers and property by motor vehicle, in interstate or foreign commerce, wholly within a municipality or between contiguous municipalities, or within a zone adjacent to and commercially a part of such municipality being under consideration, and good cause appearing therefor;

It is ordered, That said proceeding insofar as it relates to the zone adjacent to and commercially a part of Ravens-

wood, W. Va., be, and it is hereby, reopened for further consideration.

It is further ordered, That Part 170 be, and it is hereby, amended by adding thereto the following section:

§ 170.18 Ravenswood, W. Va.

That zone adjacent to and commercially a part of Ravenswood, W. Va., within which transportation by motor vehicle, in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond the zone, is partially exempt, under section 203(b)(8) of the Interstate Commerce Act (49 U.S.C. 303(b)(8)), from regulation, includes, and is comprised of, all points as follows:

(a) The municipality of Ravenswood, W. Va., itself.

(b) All points within a line drawn 3 miles beyond the corporate limits of Ravenswood, W. Va., and

(c) All points in West Virginia in that area south and southwest of those described in paragraph (b) of this section, bounded by a line as follows: Beginning at the point where the Ohio River meets the line described in paragraph (b) of this section southwest of Ravenswood, thence southerly along the east bank of the Ohio River to the point where the mouth of the Lick Run River empties into the Ohio River; thence in a northeasterly direction along the northern bank of the Lick Run River to the point where it crosses West Virginia Highway 2 south of Ripley Landing, W. Va.; thence in a northerly direction along West Virginia Highway 2 to its intersection with the line described in paragraph (b) of this section west of Pleasant View, W. Va.

(49 Stat. 546, as amended; 49 U.S.C. 304. Interprets or applies 49 Stat. 543, as amended, 544, as amended, 49 U.S.C. 302, 303)

And it is further ordered, That this order shall become effective on March 10, 1960, and shall continue in effect until the further order of the Commission.

By the Commission, Division 1.

HANDLING OF ORANGES, GRAPE-FRUIT, TANGERINES, AND TAN-GELOS GROWN IN FLORIDA

Expenses and Fixing of Rate of Assessment for 1960-61 Fiscal Period

Consideration is being given to the following proposals submitted by the Growers Administrative Committee, established under Marketing Agreement No. 84, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), as the agency to administer the terms and provisions thereof: (1) That the Secretary of Agriculture find that expenses not to exceed \$196,000 will be necessarily incurred during the fiscal period August 1, 1960, to July 31, 1961, for the maintenance and functioning of the committee established under the aforesaid amended marketing agreement and order, and (2) that the Secretary of Agriculture fix, as each handler's share of such expenses, the rate of assessment, which each handler shall pay during the aforesaid fiscal period in accordance with the aforesaid amended marketing agreement and order, at seven mills (\$0.007) per standard packed box of fruit shipped by such handler during such fiscal period.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals shall file the same with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, Room 2077, South Building, United States Department of Agriculture, Washington 25, D.C., not later than the close of business on the 10th day after the publication of this notice in the FEDERAL REGISTER. All documents should be filed in quadruplicate.

As used herein, "handler," "shipped," "fruit," "fiscal period," and "standard packed box" shall have the same meaning as is given to each such term in the said amended marketing agreement and order.

IRISH POTATOES GROWN IN MODOC AND SISKIYOU COUNTIES IN CALIFORNIA AND IN ALL COUNTIES IN OREGON EXCEPT MALHEUR COUNTY

Proposed Expenses and Rate of Assessment

Notice is hereby given that the Secretary of Agriculture is considering the approval of the expenses and rate of assessment hereinafter set forth, which were recommended by the Oregon-California Potato Committee, established pursuant to Marketing Agreement No. 114, as amended, and Order No. 59, as amended (7 CFR Part 959), regulating the handling of Irish potatoes grown in Modoc and Siskiyou Counties in California and in all Counties in Oregon except Malheur County, issued under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

Consideration will be given to any data, views, or arguments pertaining thereto, which are filed with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D.C., not later than 15 days following publication of this notice in the FEDERAL REGISTER.

The proposals are as follows:

§ 959.213 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred by the Oregon-California Potato Committee, established pursuant to Marketing Agreement No. 114, and Order No. 59, both as amended, to enable such committee to perform its functions pursuant to the provisions of the amended marketing agreement and order, during the fiscal period beginning July 1, 1960, and ending June 30, 1961, will amount to \$19,150.00.

(b) The rate of assessment to be paid by each handler, pursuant to Marketing Agreement No. 114, and Order No. 59, both as amended, shall be three-eighths cent (\$0.00375) per hundredweight of potatoes handled by him as the first handler thereof during said fiscal period.

(c) The terms used in this section shall have the same meaning as when used in the said amended marketing agreement and order.

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512; 21 U.S.C. 346a(d)(1)), the following notice is issued:

A petition has been filed by Rohm and Haas Company, 222 West Washington Square, Philadelphia 5, Pennsylvania, proposing the establishment of a tolerance of 10 parts per million for residues of maneb (manganous ethylenebisdithiocarbamate) in or on bananas.

The analytical method proposed in the petition for determining residues of maneb is that described by H. L. Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512; 21 U.S.C. 346a(d)(1)), the following notice is issued:

A petition has been filed by Crown Zellerbach Corporation, 343 Sansome Street, San Francisco 19, California, proposing the establishment of a tolerance of 110 parts per million for residues of biphenyl in or on each of the raw agricultural commodities citrus citron, kumquats, limes, tangelos, tangerines, and other hybrids of citrus fruits.

Two analytical methods are proposed in the petition for determining residues of biphenyl as follows:

1. The method published in *Analytical Chemistry*, Volume 26, page 1234 (1954).

2. A method in which biphenyl is first extracted in cyclohexane, washed with sulfuric acid and then with water. Interfering substances are removed by oxidizing with acidified potassium permanganate solution and the extract further treated with sodium carbonate, water, sulfuric acid, and finally with water.

The ultraviolet absorbancy of the cyclohexane fraction is determined at 248 millimicrons.

Notice of Filing of Petition for Estab- lishment of Tolerance for Residues of 2,3,5,6-Tetrachloronitrobenzene

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512; 21 U.S.C. 346a(d)(1)), the following notice is issued:

A petition has been filed by Sterwin Chemicals, Inc., 1450 Broadway, New York 18, New York, proposing the establishment of a tolerance of zero for residues of 2,3,5,6-tetrachloronitrobenzene in or on potatoes. The petitioner proposes that examination for residues be made after washing and peeling the treated potatoes.

The analytical methods proposed in the petition for determining residues of 2,3,5,6-tetrachloronitrobenzene are "A Polarographic Method for the Estimation of Tetrachloronitrobenzene Residues on Potatoes," by J. G. Webster and J. A. Dawson, *Analyst*, Volume 77, pages 203-205 (1952), and a modified polarographic method developed by the petitioner.

FEDERAL AVIATION AGENCY

[14 CFR Part 602]

[Airspace Docket No. 60-WA-228]

CODED JET ROUTES

Modification

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to §§ 602.524, 602.529, and 602.532, of the regulations of the Administrator, the substance of which is stated below.

VOR/VORTAC jet route No. 24 presently extends in part from the Garden City, Kans., VORTAC to the Salina, Kans., VORTAC and from the Indianapolis, Ind., VORTAC to the Charleston, W. Va., VORTAC. VOR/VORTAC jet route No. 29 presently extends in part from the Evansville, Ind., VORTAC to the Dayton, Ohio, VORTAC. VOR/VORTAC jet route No. 32 presently extends in part from the Aberdeen, S. Dak., VOR to the Duluth, Minn., VOR.

The Federal Aviation Agency is considering modifying these Jet Routes as follows:

1. Realign the segment of Jet Route 24-V from the Garden City, Kans., VORTAC to the Salina, Kans., VORTAC via the intersection of the Garden City, VORTAC 066° and the Salina VORTAC 257° True radials, and realign the segment of this jet route from the Indianapolis, Ind., VORTAC to the Charleston, W. Va., VORTAC via the intersection of the Indianapolis VORTAC 120° and the Charleston VORTAC 284° True radials.

2. Realign the segment of Jet Route 29-V from the Evansville, Ind., VORTAC to the Dayton, Ohio, VORTAC, via the intersection of the Evansville VORTAC 052° and the Dayton VORTAC 231° True radials.

3. Realign the segment of Jet Route 32-V from the Aberdeen, S. Dak., VOR to the Duluth, Minn., VOR, via the intersection of the Aberdeen VOR 067° and the Duluth, Minn., VOR 258° True radials.

The modification of these jet route segments would assist air traffic management by providing sufficient area between the jet routes and adjacent special use airspace to permit the application of non-radar lateral separation between aircraft operating on the jet routes and aircraft operating in adjacent special use airspace.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be

submitted in triplicate to the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. All communications received within forty-five days after publication of this notice in the *FEDERAL REGISTER* will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Chief, Airspace Utilization Division. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room B-316, 1711 New York Avenue NW., Washington 25, D.C.

This amendment is proposed under sections 307(a) and 313(a) of the Federal Aviation Act of 1958 (72 Stat. 749, 752; 49 U.S.C. 1348, 1354).

Issued in Washington, D.C., on September 28, 1960.

CHARLES W. CARMODY,
Chief,
Airspace Utilization Division.

[Airspace Docket No. 60-WA-194]

SPECIAL USE AIRSPACE

Revision of Part

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering revision of Part 608 of the regulations of the Administrator, as hereinafter set forth.

Section 307(a) of the Federal Aviation Act of 1958, authorizes and directs the Administrator of the Federal Aviation Agency to develop plans for and to formulate policy with respect to the use of the navigable airspace of the United States, and assign by rule, regulation, or order, the use of such airspace under such terms, conditions, and limitations as he may deem necessary in order to insure the safety of aircraft and the efficient utilization of such airspace. The Administrator may also modify or revoke assignments of airspace when required in the public interest.

In the process of managing the navigable airspace of the United States, and, in carrying out the objectives of section 307(a) of the Act, it is the Administrator's view that Part 608 should be revised in accordance with the following proposals.

Portions of the navigable airspace of the United States are presently set aside for special purposes through the designation of areas which are called "Restricted Areas." Part 608, currently entitled "Restricted Areas", governs their designation. To more properly

characterize Part 608 and to permit that Part to expand in consonance with the evolution of Special Use Airspace, it is proposed that the title of Part 608 be changed from "Restricted Areas" to "Special Use Airspace" and that the format of the regulations be altered so as to provide for the possibility of expansion of Special Use Airspace categories.

In the past the Federal Aviation Agency was without complete information as to the nature and volume of operations conducted in Restricted Areas, or of the future requirements therefor. To meet this need the Administrator adopted Special Airspace Regulation No. 1, issued July 17, 1959, as an interim measure to obtain certain data in connection with the utilization of Restricted Areas. It is now proposed to amend Part 608 to meet these requirements on a continuing basis by requiring the submission of annual reports on the utilization of Restricted Areas.

The Administrator recognizes that Restricted Areas are not always in use during the periods of their designation. Further, that during such periods of non-use the area may be utilized by air traffic. Accordingly, a policy has been established by the Administrator providing for joint use of such areas where it is determined to be feasible and desirable. This would incorporate designating a facility of the Federal Aviation Agency as Controlling Agency for those Restricted Areas where agreements between the Using Agency (as described below) and the Controlling Agency have been effected. In furtherance of this policy, the presently designated Controlling Agencies would be deleted except in those instances where an FAA facility is designated as Controlling Agency. Accordingly, all Restricted Areas with a designated Controlling Agency would be available for joint use.

The Federal Aviation Agency also has under consideration the designation of a "Using Agency" for each designated Restricted Area. The "Using Agency" would be required to perform the following functions: (a) Submission of an annual report in which details relevant to the utilization of the Restricted Area involved would be set forth; (b) Execute, upon request of the Federal Aviation Agency, an agreement establishing joint use of the Restricted Area wherein the Using Agency would notify the Controlling Agency whenever permission may be granted by the Controlling Agency for transit of or flight within the Restricted Area in accordance with the terms of such an agreement; (c) Grant permission, as appropriate, for traffic to transit the Restricted Area; and (d) Authorize and schedule activities within the Restricted Area in accordance with the terms of designation.

It is proposed to designate as "Using Agency" that organization, agency, or military command whose activity within the Restricted Area necessitated the area being so designated. This designation would be incorporated as part of the description of each Restricted Area.

The proposed annual report on the utilization of Restricted Areas would be for the 12-month period from October 1 through September 30 inclusive, to be

submitted each year to the Director of the Bureau of Air Traffic Management, Federal Aviation Agency. The report would provide detailed information regarding the use of Restricted Areas. It may be submitted directly or via appropriate agency channels. The first report would be for the period October 1, 1959, through September 30, 1960. These reports would be required to be submitted so as to reach the Director not later than January 31 of the year following the reporting period.

It is further proposed that Subpart A of Part 608 be revised by amending the "Purpose" as expressed in § 608.2 to reflect the change in name to "Special Use Airspace" rather than "Restricted Areas"; by transferring the "Prohibition" contained in § 608.3 to proposed Subpart B, which refers to Restricted Areas specifically; and by adding a new section setting forth the definitions of certain words and phrases to be used in the Subpart such as "Special Use Airspace", etc.

Consistent with the above proposed actions, a new Subpart B, entitled "Restricted Areas" is proposed. This subpart would contain a section stating the purpose for designation of Restricted Areas; a section stating the functions to be performed by the Using Agency; a section delineating the requirement and contents of the utilization report to be submitted relevant to the activity within the Restricted Area; and would further incorporate and set forth all the currently effective Restricted Area designations with the following modifications. The present descriptions of Restricted Areas would be amended as follows:

- (a) By deleting the chart reference;
- (b) By renumbering the section numbers and by assigning new numbers to the individual Restricted Areas which would correspond to the number assigned to their respective states;
- (c) By designating the pertinent "Using Agencies"; and
- (d) By deleting the "Controlling Agency" designation from those Restricted Areas no longer requiring this designation.

Since these proposed changes would not affect the description by geographical coordinates, designated altitudes and/or flight levels, or the times of designation, these elements of the description of Restricted Areas will not be included in this Notice for the purpose of brevity. However, in order to provide a ready reference to a specific Restricted Area pending revision of aeronautical charts, the existing Restricted Area numbers will be included in this Subpart following the newly designated number.

If these actions are taken, Part 608 of the regulations of the Administrator would be revised to read as follows:

Subpart A—Introduction

§ 608.1 Basis.

This part is issued pursuant to Sections 307 and 313 of the Federal Aviation Act of 1958, as amended (72 Stat. 749, 752, 49 U.S.C. 1348, 1354), and § 60.13 of this title.

§ 608.2 Purpose.

This part is issued in order to designate special use airspace and to prescribe requirements in connection with the use thereof.

§ 608.3 Explanation of terms.

As used in this part, terms are defined as follows:

"Appropriate Authority" means either the Using Agency or the Controlling Agency.

"Bearings and radials" will be true and outbound from the point of origin.

"Boundaries" mean the horizontal limits of the special use area as described by geographical coordinates or other appropriate references to clearly define the perimeter of the area.

"Continental United States" means all of the States of the United States (excluding Alaska and Hawaii), the District of Columbia, the territorial waters and the overlying airspace thereof.

"Controlling Agency" means that FAA facility designated in this subpart which may authorize transit of a Restricted Area in accordance with a letter of agreement.

"Designated Altitudes" means those altitudes designated as the floor(s) and ceiling(s) of a special use area. Altitudes will be expressed in terms of flight levels or as feet above mean sea level.

"E" means east.

"Federal Airway" means a portion of the navigable airspace of the United States designated by the Administrator as a Federal Airway.

"Flight Level" means a level of constant atmospheric pressure related to a reference datum of 29.92 inches of mercury expressed in three digits representing hundreds of feet. For example, flight level 250 is equivalent to an altimeter indication of 25,000 feet and flight level 265 to 26,500 feet.

"FM" means fan marker.

"ILS" means instrument landing system.

"INT" means intersection.

"Joint Use" means use of a Restricted Area by the Using Agency and by the Controlling Agency as set forth in a letter of agreement. A letter of agreement in this regard outlines terms and procedures to be followed by the Using Agency and by the Controlling Agency relative to the use of the area.

"Mile" means statute mile unless otherwise specified.

"MM" means instrument landing system middle marker.

"MSL" means "mean sea level."

"N" means north.

"NE" means northeast.

"NW" means northwest.

"OM" means instrument landing system outer marker.

"RBN" means radio beacon.

"Restricted Area" means that special use airspace designated in Subpart B of this part wherein the flight of aircraft is limited in accordance with § 608.12 of this part.

"RR" means low or medium frequency radio range station.

"S" means south.

"SE" means southeast.

"Special Use Airspace" means that airspace of defined dimensions identified by an area on the surface of the earth designated by the Administrator wherein the activity being conducted must be confined because of its nature and/or wherein limitations are imposed upon aircraft operations not a part of such activity. The dimensions are limited in time ("Time of Designation"), vertical extent ("Designated Altitudes"), and horizontal extent ("Boundaries").

"Sunset" and "Sunrise" mean the official sunset and sunrise at the location of the special use area.

"SW" means southwest.

"TACAN" means military tactical air navigation aid.

"Time of Designation" means the period or periods of time during which the special use area is in effect.

"United States" means the territory comprising the States, possessions, the District of Columbia, the territorial waters and the overlying airspace thereof.

"Using Agency" means that agency, organization, or military command designated in this subpart whose activity within the Restricted Area necessitated the area being so designated.

"VHF" means very high frequency.

"VOR" means very high frequency omnirange station.

"VORTAC" means collocated VOR and TACAN.

"W" means west.

Subpart B—Restricted Areas

§ 608.11 Purpose.

The purpose of this Subpart is to designate Restricted Areas. All activities conducted in a Restricted Area in accordance with the purposes for which it was designated must be contained therein. In addition, limitations are imposed upon the operation of aircraft within designated Restricted Areas in accordance with § 608.12.

§ 608.12 Restriction.

No person shall operate an aircraft within any area named and described in this Subpart, between the designated altitudes, during the time of designation, unless prior permission for such operation has been issued by the appropriate authority.

§ 608.13 Using Agency.

The Using Agency shall: Submit an annual utilization report as prescribed in § 608.15 on each Restricted Area for which it has been designated "Using Agency" provided, however, that annual utilization reports need not be submitted on Restricted Areas established for climb corridors; execute upon request of the Federal Aviation Agency, an agreement establishing joint use of the Restricted Area wherein the Using Agency would notify the Controlling Agency whenever permission may be granted by the Controlling Agency for transit of or flight within the Restricted Area in accordance with the terms of such an agreement; schedule activities in the Restricted Area; and authorize transit of or flight within the Restricted Area as feasible.

§ 608.14 Controlling Agency.

The Controlling Agency, where feasible, may clear and authorize air traffic for transit of or flight within a Restricted Area as set forth in a letter of agreement between the Using Agency and the Controlling Agency.

§ 608.15 Utilization report.

The following data are to be submitted annually for the 12-month period October 1 through September 30 inclusive. Such data will be forwarded by the Using Agency each year so as to reach the Director, Bureau of Air Traffic Management, Federal Aviation Agency, Washington 25, D.C., not later than

January 31 of the year following the reporting period.

(a) Designated name and number of the area as published in Regulations of the Administrator, Part 608—Special Use Airspace.

(b) Period covered by the report.

(c) A detailed list of the activities carried on in the Restricted Area by all organizations utilizing the area for the restricted area purposes.

(d) Time daily operations normally are scheduled to begin and end.

(e) Average number of hours the area is actually used per day.

(f) Number days per week, weeks per month, months per year (as appropriate) the area is used for actual operations.

(g) A statement (affirmative or negative) as to whether radar is utilized during operations.

(h) Number and type of aircraft, if any, normally involved in performing activities for which the Restricted Area is designated.

(i) Altitudes used in daily operations of aircraft. Include for each activity, the altitudes utilized and the number of hours at each such altitude.

(j) A chart of the Restricted Area (of optional scale and design) depicting the following applicable items:

(1) Approximate location (and/or representative pattern) of firing and/or bombing runs, if any, showing, if appropriate, where run begins, where firing, if any, commences and ends, and release point and pull up.

(2) Location of impact areas, if any.

(k) Maximum ordinate of surface to surface firing (expressed in feet, mean sea level altitude) used to execute required operations.

(l) Number of hours and/or minutes (daily) maximum ordinate altitudes are normally utilized in surface to surface firing operations.

(m) Altitudes normally used for daily surface to surface firing operations.

(n) A chart of the Restricted Area (of optional scale and design) depicting the following:

(1) Location of firing points and impact areas, if any.

(2) Perimeter of the firing fan for each weapon utilized, if any.

(o) A brief resume outlining any other pertinent facts concerning the present use of the Restricted Area and requirement for continued use of the area or any part of it.

Federal Maritime Board

[Docket No. 917]

INVESTIGATION OF FREE TIME AND/OR FREE STORAGE PRACTICES; PACIFIC NORTHWEST

Notice of Investigation and of Hearing

On September 23, 1960, the Federal Maritime Board entered the following order:

Whereas, certain terminal companies in the Port of Seattle, Washington, listed in Appendix A, attached hereto and

made a part hereof, participate in the Terminal Tariff published by the Port of Seattle, and furnish "wharfage, dock, warehouse, or other terminal facilities in connection with a common carrier by water" within the meaning of section 1 of the Shipping Act, 1916, as amended; and

Whereas, certain terminal companies in the Port of Portland, Oregon, listed in Appendix B, attached hereto and made a part hereof, participate in the Terminal Tariff published by the Commission of Public Docks of the Port of Portland, and furnish "wharfage, dock, warehouse, or other terminal facilities in connection with a common carrier by water" within the meaning of section 1 of the Shipping Act, 1916, as amended; and

Whereas, the Port of Seattle and the Commission of Public Docks of the Port of Portland, have amended their terminal tariffs on file with the Federal Maritime Board, to offer long extended free time and/or storage with respect to the following commodities:

Port of Seattle

Seattle Terminals Tariff No. 2D, WN. T. No. 21, Item No. 6010, First Revised Page 75—Effective August 1, 1960. 120 days on Wool.

The Commission of Public Docks of the City of Portland, Ore.

Terminal Tariff No. 3A, Item No. 37(d), Fourth Revised Page 402—Effective September 15, 1960. 180 days on Plywood; Veneered Wood; Veneer Doorskins and Corestock; Twine, Baler or Binder; Fencing and Nails; Urea and Fertilizer. 120 days on Wool. 90 days on Tapioca Flour.

Whereas, it appears that the Port of Seattle, the Commission of Public Docks of the Port of Portland, and the persons named in Appendices A and B attached hereto, now grant, or will soon grant, long extended free time and/or free storage with respect to certain commodities; and

Whereas, it appears that aforesaid practices may constitute the granting of undue or unreasonable preference or advantage to certain persons, localities and/or descriptions of traffic, in violation of section 16 of the Shipping Act, 1916, as amended (46 U.S.C. 815), or may constitute unjust or unreasonable practices in violation of section 17 of said Act (46 U.S.C. 816),

Now therefore, it is ordered, That the Board on its own motion, enter upon a proceeding of inquiry and investigation pursuant to section 22 of the Shipping Act, 1916, as amended (46 U.S.C. 821), to determine whether such free time and/or storage practices at Seattle, Washington, and Portland, Oregon, may be in violation of sections 16 and/or 17 of the Shipping Act, 1916, as amended (46 U.S.C. 815, 816): and

It is further ordered, That the persons named in Appendices A and B attached hereto, be, and the same are hereby named respondents in this proceeding, which is to be set for hearing before an examiner of the Office of Hearing Examiners, at a time and place to be announced; and

It is further ordered, That a copy of this order be served upon each of the respondents and published in the FEDERAL REGISTER.

Pursuant to the above order, notice is hereby given that the hearing herein ordered will be held before an examiner of the Board's Office of Hearing Examiners at a date and place to be determined and announced by the Chief Examiner. The hearing will be conducted in accordance with the Board's rules of practice and procedure, and a recommended decision will be issued by the examiner.

All persons (including individuals, corporations, associations, firms, partnerships, and public bodies) having an interest in this proceeding and desiring to intervene therein, should notify the Secretary of the Board promptly and file petitions for leave to intervene in accordance with Rule 5(n) (46 CFR § 201.74) of said rules.

Dated: September 29, 1960.

By order of the Federal Maritime Board.

JAMES L. PIMPER,
Secretary.

Notice of Agreements Filed for Approval

Notice is hereby given that the following described agreements have been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916 (39 Stat. 733, 46 U.S.C. 814):

(1) Agreement No. 7812-5, between Stockard Steamship Corporation, Atlantic Ocean Transport Corporation and Mediterranean Transport Corporation (carriers comprising the Levant Line joint service) modifies the approved joint

service Agreement No. 7812, as amended, which covers the trade between Canadian and U.S. Atlantic and Gulf ports, on the one hand, and ports in Europe, and in the Mediterranean, Red Sea, Persian Gulf, North Africa and the Far East, on the other hand. This modification provides for the pooling and apportionment as between Stockard and Atlantic, of all freight, passenger, mail, charter and other voyage revenues resulting from the operations of the vessels of such parties under joint service Agreement No. 7812, as amended, pursuant to the terms and conditions set forth in said modification.

(2) Agreement No. 8033-2, between American President Lines, Ltd., and American Mail Line, Ltd., modifies their approved agreement (No. 8033, as amended), which covers an arrangement whereby American Mail acts as agent for American President for the husbanding of vessels and solicitation of commercial cargo in the States of Washington and Oregon. The purpose of the modification is to provide that American Mail shall receive commission of 5 percent on outward commercial cargo solicited and booked for vessels of American President instead of 2½ percent, as presently provided.

Interested parties may inspect these agreements and obtain copies thereof at the Office of Regulations, Federal Maritime Board, Washington, D.C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to either of these agreements and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: September 29, 1960.

[Docket No. 11278, etc.; Order No. E-15851]

NEW YORK-SAN JUAN CARGO RATES INVESTIGATION ET AL.

Order of Investigation and Suspension

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of September 1960.

In the matter of the New York-San Juan cargo rates investigation, Docket 11278 et al.; in the matter of the proposed specific commodity rates of Riddle

¹ Riddle's proposed decreases are applicable on all specific commodity rates except human remains, books, magazines, newspapers, and periodicals. The tariff proposes reductions from \$15.00 per 100 pounds, minimum weight 100 pounds, to \$14.00 per 100 pounds, minimum weight 100 pounds northbound, and a decrease from \$15.00 per 100 pounds, minimum weight 100 pounds to \$14.50 per 100 pounds, minimum weight 100 pounds southbound on commodity groups 30 and 60.

Airlines, Inc., Pan American World Airways, Inc. Complaints of Trans Caribbean Airways, Inc., Pan American World Airways, Inc., Allied Air Freight International Corp., Dockets 11790, 11796, and 11797.

By tariff revisions filed to become effective October 2, 1960, Riddle Airlines, Inc., has proposed decreases in most specific commodity rates between Puerto Rico and New York. Pan American World Airways, Inc., has proposed similar decreases, to be effective October 19, 1960, which it states are filed for defensive purposes and that it is prepared to withdraw its tariff if the relief requested in its complaint is granted.

Complaints against Riddle's proposed tariff have been filed by Transportation Corporation of America d/b/a Trans Caribbean Airways, Inc. (Trans Caribbean), Docket 11790, Pan American World Airways, Inc. (Pan American), Docket 11796, and Allied Air Freight International Corp. (Allied), Docket 11797. These carriers allege, inter alia, that the tariff is not in fact applicable to true specific commodity groupings since such groupings include a substantial majority of the cargo in this market; that the proposed decreases would reduce cargo rates between New York and Puerto Rico to an uneconomic level and would be unjust, unreasonable, unjustly discriminatory, unduly preferential, and unduly prejudicial; that the Board has instituted an investigation of certain reduced New York-San Juan cargo rates in Docket 11278 et al. and by Order E-15521 dated July 8, 1960, ordered investigated and suspended proposed reduced commodity rates of Riddle in this market; that the considerations which led the Board to suspend the proposed Riddle rate reductions by Order E-15521 are equally applicable herein.

In our Order E-15521 we noted that the outward manifestations of a cargo "rate war" in progress are evident, and stated:

In 1959, the general commodity rate for shipments in minimum weights of 100 pounds in the New York-San Juan market was \$20.00 per hundred pounds and the rate for shipments in minimum weights of 3300 pounds in the same market was \$17.00 per hundred. In less than nine months the air carriers offering cargo service between the mainland and Puerto Rico have filed a series of revisions to their rates and charges culminating in the latest proposals.

The specific commodity groupings to which the tariff reductions apply cover a wide range of commodities and affect a significant portion of the total market. The tariff filing appears to be one more step in a series of tariff filings which have resulted in very substantial reductions in cargo rates in this market and which have necessitated investigation and investigation and suspension orders by the Board. We find that the proposed cargo rate reductions may therefore be unjust or unreasonable, or unjustly discriminatory, or unduly preferential; or unduly prejudicial. Under these circumstances we will investigate the proposed tariff reductions, consolidate the investigation instituted herein with the investigation pending in Docket 11278 et al., and sus-

pend the tariff proposals pending the investigation.²

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 404, and 1002 thereof,

It is ordered, That:

1. An investigation is hereby instituted to determine whether the rates and provisions from Arecibo, Mayaguez, Ponce, Ramey Field, and San Juan, P.R., to New York, N.Y., for Commodity Group Nos. 20, 30, and 210 and from New York, N.Y., to Arecibo, Mayaguez, Ponce, Ramey Field and San Juan, P.R., for Commodity Group Nos. 30 and 60 appearing on 16th Revised Page 10 to tariff C.A.B. No. 7 of Riddle Airlines, Inc.; and the rates and provisions from New York, N.Y., to San Juan, P.R., in Item Numbers 1226, 1400, 1500, 2199, 2500Z, 3965, 4702, 6802, 9540, 9700, and 9994, and from San Juan, P.R., to New York, N.Y., in Item Numbers 115, 116, 2990, 4401, 4702, 5000, 9540, and 9994, appearing on Original Page 10-J, 65th Revised Page 38 and 29th Revised Page 40-C to Agent R. C. Lounsbury's tariff C.A.B. No. 118, are, or will be, unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial or otherwise unlawful, and if found to be unlawful, to determine and prescribe the lawful rates and provisions.

2. Pending hearing and decision on the lawfulness thereof, the rates and provisions from Arecibo, Mayaguez, Ponce, Ramey Field, and San Juan, P.R., to New York, N.Y., for Commodity Group Nos. 20, 30, and 210 and from New York, N.Y., to Arecibo, Mayaguez, Ponce, Ramey Field, and San Juan, P.R., for Commodity Group Nos. 30 and 60 on 16th Revised Page 10 to tariff C.A.B. No. 7 of Riddle Airlines, Inc.; and the rates and provisions from New York, N.Y., to San Juan, P.R., in Item Numbers 1226, 1400, 1500, 2199, 2500Z, 3965, 4702, 6802, 9540, 9700, and 9994, and from San Juan, P.R., to New York, N.Y., in Item Numbers 115, 116, 2990, 4401, 4702, 5000, 9540, and 9994 appearing on Original Page 10-J, 65th Revised Page 38 and 29th Revised Page 40-C to Agent R. C. Lounsbury's tariff C.A.B. No. 118, be and hereby are suspended and their use deferred to and including December 30, 1960, and no changes shall be made therein during the period of suspension except by order or special permission of the Board.

3. The complaints of Transportation Corporation of America d/b/a Trans

² Riddle in support of its tariff proposal asserts that its action is necessary to meet presently competitive provisions and is taken only for that purpose. In the light of all the circumstances we are not persuaded by this statement that we should permit these tariff filings to become effective. Riddle's proposed rates are lower than the specific commodity rates of any other direct air carrier in this market. While Allied Air Freight International Corp., an airfreight forwarder, has presently in effect 17 commodity rates of 14 cents per pound, minimum weight 100 pounds northbound, and 14.5 cents per pound minimum weight 100 pounds southbound, these rates have been in effect since 1959. Allied's general commodity rate northbound, minimum weight 100 pounds, is 15 cents per pound, and southbound is 14.5 cents per pound.

Caribbean Airways, Docket 11790, Pan American World Airways, Inc., Docket 11796, and Allied Air Freight International Corp., Docket 11797 are consolidated with the proceeding designated in the Matter of New York-San Juan Cargo Rates Investigation, Docket 11278 et al.

4. A copy of this order shall be filed with the suspended tariffs and shall be served upon Allied Air Freight International Corp., Pan American World Airways, Inc., Riddle Airlines, Inc., and Transportation Corporation of America.

This order will be published in the FEDERAL REGISTER.

[Docket No. 13596]

OPERATION OF STANDARD BROADCAST STATIONS WITH FULL CARRIER AND SINGLE SIDEBAND

Order Extending Time for Filing Comments

1. The Commission has before it for consideration a request of Kahn Research Laboratories, Inc., Freeport, Long Island, filed September 22, 1960, to extend the time for filing comments in the above-entitled proceeding from September 30, 1960, to October 31, 1960.

2. The petitioner states that the additional time requested is needed to prepare a comprehensive response to the questions upon which the Commission invited data and views in its Notice of Inquiry in this proceeding.

3. Upon consideration of petitioner's views and the nature and range of the questions upon which data and views were invited, the Commission believes that extending the closing date for the submission of comments is desirable to afford adequate time for the preparation of meaningful comments and that the public interest would be served by the extension.

4. In view of the foregoing: *It is ordered*, This 28th day of September 1960, that the request of Kahn Research Laboratories, Inc., for extension of time is granted, and that the time for filing comments in response to the Notice of Inquiry herein is extended from September 30, 1960, to October 31, 1960.

Released: September 29, 1960.

SOUTHERN TRANSMISSION CORP.

Order Designating Matter for Hearing on Stated Issues

In re applications of Southern Transmission Corporation, Docket No. 13779; for construction permit for new fixed video station at Palm Beach Gardens, Florida (KJE50), File No. 3060-C1-P-60; for construction permit for new fixed radio station at Stuart, Florida (KJE51), File No. 3061-C1-P-60; for construction permit for new fixed radio station at Fort Pierce, Florida (KJE52), File No. 3062-C1-P-60.

At a session of the Federal Communications Commission held at its offices in

Washington, D.C., on the 20th day of September 1960;

The Commission having under consideration a protest and petition for reconsideration timely filed, on August 24, 1960, by Gene T. Dyer, permittee of television station WTVI, Fort Pierce, Florida (hereinafter referred to as Dyer), protesting the grant without hearing, on July 20, 1960, of the above-indicated applications of Southern Transmission Corporation (hereinafter referred to as Southern); the opposition to such protest and petition timely filed by Southern on September 6, 1960; and a reply to Southern's opposition timely filed by Dyer on September 12, 1960; and

It appearing that Dyer is a party in interest with standing to protest and petition for reconsideration herein, and that said protest and petition are legally sufficient; and

It further appearing that the basic questions and issues raised in this protest and petition are essentially similar to those pending before us in various other cases (cf. In re Applications of Montana-Idaho Microwave, Inc., Docket Nos. 13266 thru 13270) and In re Applications of Antennavision Service Co., Inc. (Docket No. 13385)); and that a preliminary disposition of this case should parallel our preliminary disposition of the cited cases; and

It further appearing that it is necessary and desirable to redraft certain of the issues proposed by Dyer; and

It further appearing that the instant grants are not necessary to the continuance of an existing service; and that we are unable to conclude that the public interest requires that the contested grants remain in effect pending final disposition herein; and

It further appearing that the disposition herein of the protest renders moot the request for reconsideration;

It is ordered, That the protest is granted to the extent herein provided, and denied in all other respects; and the petition for reconsideration is denied; and that, pursuant to the provisions of section 309(c) of the Communications Act of 1934, as amended, a hearing be held herein at the offices of the Commission in Washington, D.C., at a time and place to be hereafter announced, on the following issues:

(1) To determine whether it would be in the public interest to defer final disposition of the applications until a court of competent jurisdiction has determined whether the applicant proposes to furnish programs to the cable operator in Fort Pierce and Vero Beach for dissemination in violation of the program rights of WTVI.

(2) To determine (a) the nature and extent of any adverse effect which the grant of the applications herein will have upon the operation of Station WTVI; (b) the effect which the grant of the applications will have upon the development of local television broadcasting in the area afforded access to the instant microwave relay service; and (c) the nature and extent of television service which will be available in the

WTVI coverage area if WTVI is unable to commence and continue operation.

(3) To determine whether the conclusions set forth in paragraphs 45 thru 51 and 58 thru 79 of the Report and Order in Docket No. 12443, as applied in this case, are in error.

(4) To determine whether, in view of all the findings and conclusions set forth in our Report and Order in Docket No. 12443, the basic television allocation plan embodied in § 3.66 of the Commission's rules has any further relevance to the case and, if that determination is in the affirmative, to determine further whether a grant of the applications herein would effectuate or impede such television allocation plan.

(5) To determine whether Southern Transmission Corporation is eligible, as a communications common carrier under the Communications Act, to receive authorizations pursuant to Part 21 of the Commission's rules to provide the proposed services.

(6) To determine whether in the light of the determinations made upon the foregoing issues, the Commission should sustain the protest and set aside the grants of the applications herein.

It is further ordered, That the grants of the foregoing applications, effected July 20, 1960, are hereby stayed pending the Commission's final decision in this matter after hearing; and

It is further ordered, That Dyer, Southern, the Chief, Common Carrier Bureau, and the Chief, Broadcast Bureau, are hereby made parties to this proceeding; and that each party intending to participate in the hearing herein shall file a Notice of Appearance not later than October 10, 1960.

Released: September 29, 1960.

SECURITIES AND EXCHANGE COMMISSION

[File No. 1-4015]

CONSOLIDATED DEVELOPMENT CORP.

Order Summarily Suspending Trading

SEPTEMBER 28, 1960.

The common stock, par value 20 cents per share of Consolidated Development Corporation (formerly known as Consolidated Cuban Petroleum Corporation), being listed and registered on the American Stock Exchange, a national securities exchange; and

The Commission being of the opinion that the public interest requires the summary suspension of trading in such security on such Exchange and that such action is necessary and appropriate for the protection of investors; and

¹ Filed as part of the original document. Copies available upon request to the Board of Governors of the Federal Reserve System, Washington 25, D.C., or to any Federal Reserve Bank.

The Commission being of the opinion further that such suspension is necessary in order to prevent fraudulent, deceptive or manipulative acts or practices, with the result that it will be unlawful under section 15(c)(2) of the Securities Exchange Act of 1934 and the Commission's Rule 15c2-2 thereunder for any broker or dealer to make use of the mails or of any means or instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of such security, otherwise than on a national securities exchange;

It is ordered, Pursuant to section 19(a)(4) of the Securities Exchange Act of 1934 that trading in said security on the American Stock Exchange be summarily suspended in order to prevent fraudulent, deceptive or manipulative acts or practices, this order to be effective for a period of ten (10) days, September 29, 1960, to October 8, 1960, both dates inclusive.

By the Commission.

[File No. 24S-1773]

EDSCO MANUFACTURING CO., INC.

Order Temporarily Suspending Exemption, Statement of Reasons Therefor, and Notice of Opportunity for Hearing

SEPTEMBER 28, 1960.

I. On July 14, 1960, Edsco Manufacturing Co., Inc., which was incorporated March 18, 1960 under the laws of the State of Washington with its business office at 801 West 8th Street, Vancouver, Washington, filed with the Commission a notification on Form 1-A and an offering circular under Regulation A relating to a proposed offering of 24,500 shares, par value \$10, at a price of \$10 a share for an aggregate amount of \$245,000, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3(b) thereof and Regulation A promulgated thereunder.

II. The Commission has reasonable cause to believe that:

A. The aggregate offering price of the securities to be offered, as computed in accordance with Rule 253, will exceed \$300,000.

B. The offering circular and other material filed therewith contain untrue statements of material facts and omit to state material facts necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading, particularly with respect to:

1. The fact that written offers of the issuer's shares have been made without the use of an offering circular containing the information specified in Schedule I of Form 1-A;

2. The fact that the notification on Form 1-A does not set forth the information required by Item 2(b) as to the issuer's affiliates;

3. The fact that the offering circular fails to furnish, as required by Item 6(a) of Schedule I, a reasonably itemized statement of the purposes for which the net cash proceeds to the issuer from the sale of securities are to be used;

4. The fact that the offering circular fails to state as required by Item 9(b) of Schedule I, the annual aggregate remuneration of all the issuer's officers and directors as a group;

5. The fact that separate financial statements of assets and liabilities have not been submitted as required by Item 11 of Schedule I;

6. The fact that the statement of cash receipts and disbursements submitted does not cover the full period required by Item 11(a) of Schedule I;

7. The fact that sales material consisting of letters, circulars and other written communications have not been filed prior to the use thereof in accordance with Rule 253.

C. The issuer's shares were offered to the public by sales literature consisting of a circular letter denominated "A personal letter to all fellow electricians and contractors in the State of Washington from E. W. 'Ed' Swan" and a pamphlet entitled "Prospectus—Blueprint for Power" and that this sales literature contains untrue statements of material facts and omits to state material facts necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading, particularly with respect to:

1. The necessity of acting at once in order to acquire shares of Edsco Manufacturing Co., Inc.;

2. The statement that Edsco is rapidly becoming a standard name in the electrical industry;

3. The failure to disclose that under the terms of the agreement by which he sold his interest in Swan Manufacturing Co., a partnership, E. W. Swan agreed for a period of time not to make a certain type of electrical baseboard heater;

4. The failure to disclose that the predecessors of Edsco Manufacturing Co., Inc. had between January 1, 1959 and April 30, 1960 suffered a net loss in excess of \$30,000;

5. The failure to disclose that there is no public market for the issuer's shares;

6. The failure to disclose that Edgar W. Swan held a controlling interest in Edsco Manufacturing Co., Inc. and would hold such controlling interest if all the shares being offered are sold.

D. The offering would be made in violation of section 17 of the Securities Act of 1933, as amended.

III. *It is ordered*, Pursuant to Rule 261(a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for hearing

within thirty days after the entry of this order; that within twenty days after receipt of such request the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; that if no hearing is requested and none is ordered by the Commission, this order shall become permanent on the thirtieth day after its entry and shall remain in effect unless or until it is modified or vacated by the Commission; and that notice of the time and place for any hearing will promptly be given by the Commission.

By the Commission.

Assistant Secretary.

TARIFF COMMISSION

[7-94]

PLASTIC RAINCOATS

Notice of Investigation and Date of Hearing

Having found in the course of investigation No. 3-9 under section 3 of the Trade Agreements Extension Act of 1951, as amended (25 F.R. 4779), that an increase in duty or additional import restriction on the articles described below is required to avoid serious injury to the domestic industry producing like or directly competitive articles, the United States Tariff Commission, in accordance with section 3(b) (1) of the said Act, instituted an investigation on the 29th day of September 1960, pursuant to section 7 of the said Act, for the purpose of determining whether such articles are, as a result, in whole or in part, of the customs treatment reflecting the concession granted thereon under the General Agreement on Tariffs and Trade, being imported into the United States in such increased quantities, either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products.

Imported articles covered by the investigation. The imported articles covered by this investigation are raincoats, wholly or in chief value of unsupported plastic film. Such raincoats are dutiable under the provision in paragraph 1537(b) of the Tariff Act of 1930 for manufactures wholly or in chief value of india rubber, not specially provided for, by similitude (paragraph 1559(a) of the Tariff Act of 1930) to raincoats in chief value of india rubber, at the trade-agreement rate of 12½ percent ad valorem.

Public hearing ordered. A public hearing in connection with this investigation will be held beginning at 10 a.m. e.s.t., on January 24, 1961, in the Hearing Room, Tariff Commission Building, Eighth and E Streets NW., Washington,

D.C. Interested parties desiring to appear and to be heard should notify the Secretary of the Commission, in writing, at least five days in advance of the date set for the hearing.

Issued: September 29, 1960.

By order of the Commission.
